Municipal Survey

July 22, 2026

Methodology

The Ottawa Compass engaged Liaison Strategies to survey a random sample of 1000 Ottawa residents from July 17th to July 19th, 2026, using Interactive Voice Recording (IVR) technology. To ensure a representative sample, participants were reached through random digit dialling (RDD) across both landline and cellular phone networks.

The resulting data was weighted to match targets based on the 2021 Census. For the total sample, the margin of error is ± 3.09 percentage points, 19 times out of 20, though this margin is higher for sub-samples. Additionally, results may not add up to 100% due to rounding.
