The Patriot Signature Series DDR5 CSODIMM is easy to set up and use with its plug and play design, a speedy perk to anyone with a busy lifestyle! Designed to boost operating frequencies and improve stability, the CSODIMM enhances the speed of your operating systems with the high speed of DDR5 CKD 7200MT/s, while still doing away with any errors, lost data, or system freezes.

The Patriot Signature Series DDR5 CSODIMMs are also designed to prevent overheating with a low voltage of only 1.1v, allowing it to emit less heat and consume less power while still bringing you increased speeds. To further improve the accuracy of data-processing and system stability, these memory modules are also made with the latest DDR5 non-ECC unbuffered technology. The Patriot Signature Series DDR5 CSODIMMs have been tested across the latest Intel and AMD DDR5 platforms for best compatibility, ensuring they are ready to enhance your system!
