- ✓ Advanced Access & Pricing Controls
- ✓ Remote Oversight & Maintenance
- ✓ 6% L2 Commercial Marketshare
- ✓ 15+ Certified Hardware Partners

THE AMPUP PLATFORM

EV CHARGER MANAGEMENT SUITE

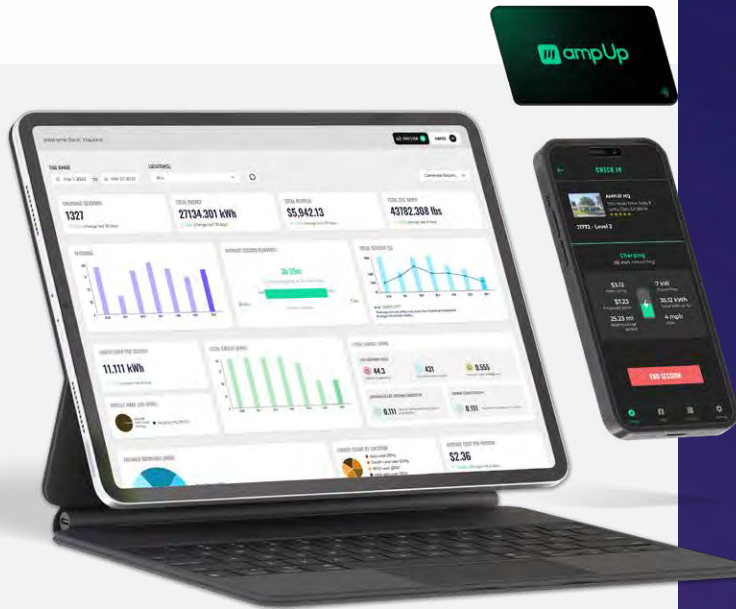

AMPUP EVCloud

Take control of your charging network with intuitive oversight controls, remote diagnostics, and real-time analytics.

DRIVER ACCESS TOOLS

AMPUP DriverApp

Allows drivers to find, pay for, and manage charging sessions on the web or mobile devices—with options for RFID and app-less access.

WHERE YOU'LL FIND AMPUP

Workplaces

Give your employees and visitors access to hassle-free charging that fits into their routines.

Municipal / Utilities

Provide public charging along with remote monitoring, load balancing, and energy optimization.

Hospitality

Level-up your guest experience with reliable charging and flexible payment and access options.

Multifamily

Offer reliable and convenient on-site charging and easily manage access for residents.

Retail

Boost customer loyalty and sales by offering convenient EV charging that encourages extended visits.

Fleet

Ensure fleets are road-ready while minimize costs and simplifying charge management.

WHY CHARGE WITH AMPUP?

From city streets to business fleets, AmpUp makes EV charging simple, accessible, and future-ready for all.

Industry-Leading Reliability

99.9% uptime and a 98.5% charging success rate means your chargers are ready whenever and wherever your drivers need them, every time.

Built to Scale As You Grow

OCPP-compliant, hardware-agnostic, and always up-to-date — AmpUp is designed to evolve with your changing EV charging needs.

Easy to Install

Simplify charger installations and maintenance with fast setup and comprehensive remote diagnostics.

Eco-Friendly & Cost Efficient

Smart load management optimizes energy use on the fly, lowering operating costs and supporting a healthier, greener future.

PLATFORM FEATURES

Built for both growing and established EV networks, the AmpUp platform delivers everything you need to manage, optimize, and scale your charging operations.

Revenue Generation

Monetize your EV charging stations with flexible pricing models that enable instant revenue generation, whether public or private.

Smart Load Management

Control how energy is balanced across stations to optimize energy consumption, reduce costs, and minimize grid strain.

Real-Time Analytics

Gain real-time visibility and control over your stations by remotely monitoring performance, usage patterns, and energy consumption.

Access Management

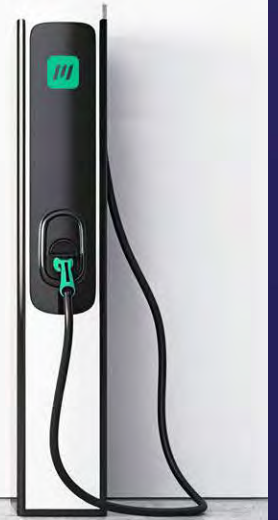

Manage charger access across apps, RFID cards, and user groups with ease—whether it's employees, residents, or the public.

Remote Diagnostics

Resolve issues in real-time with remote diagnostics — including resets — minimizing downtime and ensuring your chargers stay online.

Responsive Support

Count on our go-the-extra-mile support team to resolve issues quickly and keep your EV operations up and running smoothly.
