We continuously invest in innovative production methods and smart processes. And, most of all: we listen to you and your pet. Your adventures and experiences are an inspiration to all of us at ARION – and they help us do even better every day.

An overview of the nutrients and essential building blocks in our ARION Fresh products.

## RESPECTING THE BEST NATURE HAS TO OFFER.

Whole grains are not only a source of minerals and fiber, they are also the most important raw material of B vitamins, the vitamin complex that supports a number of bodily functions. At ARION, we believe that ingredients such as yeast, seeds and whole grains – like wheat and oats – are essential for a healthy diet. That's why we rolled up our sleeves and got to work with the best that nature has to offer – together with local partners, and always with the utmost respect for the ingredients we use. That's what ARION Fresh is all about.

A young boy with dark hair is shown in profile, holding a small, light-colored puppy with dark spots. They are positioned in front of a scenic background of a sandy beach, waves, and a grassy dune under a warm, golden light. The overall tone is nostalgic and tender.

*Does your puppy  
sleep a lot?*

No wonder: growing up is a lot of work, and sleep is very important for his development. So as much as you would love to take your new pet out for a walk, make sure your puppy gets plenty of rest first.

# WELCOME, LITTLE FRIEND.

↗  
*Alessandro and his  
little Labrador Gigi.*

Bringing a young puppy into your home is quite a responsibility. Keep in mind that moving to a new environment is a very exciting experience for your dog. To make the transition as pleasant as possible, make sure to give your little furry friend a place of his own – like a cozy basket or a soft blanket. And oh: don't take it the wrong way if he ends up choosing a different designated hangout. Puppies can be just as picky as their owners.

# SUSTAINABILITY IN EVERY STEP.

At ARION, we want to contribute to a better world. For you, your four-legged friend and the generations that follow. From the very beginning, we have been working hard to limit our impact on the environment. That's why, for example, we prefer to work with local partners and locally sourced ingredients as a way to limit CO<sub>2</sub> emissions. Sustainability is in everything we do; from our biofilters that neutralize exhaust air odors, to the solar panels on our roof and the smart led lamps in our warehouse. We believe it's important to recycle and re-use as much as possible. If we have finished products lying around that near their best-before dates, we donate them to local animal shelters. And if we do have waste flows, we make sure nothing ends up in nature. That's how we try to give the best of ourselves, time and time again.

Plus, we added extra antioxidants like zinc and vitamin E to boost your dog's natural immune defense.

### **HYPERSENSITIVITY**

Some dogs are sensitive to specific ingredients, which can cause reactions such as itching, hair loss or even gastrointestinal issues. In most cases, the cause is one specific animal protein.
