When shopping for Baby Trend travel gear, including strollers and prams, some parents may encounter issues with wheels or other parts - like flat tires or needing to replace inner tubes. Finding the right replacement parts is key to keeping your Baby Trend stroller running smoothly. Stroller Parts for Baby Trend include wheels, canopy, brakes, and more. Most commonly requested parts are for jogging strollers and Sit and Stand strollers, particularly wheel-related issues. Some of the most popular Baby Trend stroller parts are: \* Wheels / Tubes Replacement \* Tires and wheels for Baby Trend strollers \* Inner tubes for rear wheels (such as Lineament tube) \* Replacement seats, snack trays, and other components These replacement parts are designed to be easy to assemble and come with everything needed to replace the part. They're compatible with various Baby Trend models, including jogging strollers like the Expedition series. Some popular alternatives to original parts include upgraded inner tubes (such as 2 x BABY TREND EXPEDITION Stroller/Jogger REAR Inner Tubes) or tire sets with enhanced features like puncture resistance and better air retention. Quality replacement parts from reputable manufacturers are available, even though they're not OEM (original equipment manufacturer) products made by BabyTrend. The Baby Trend Stroller inner tube (front wheel) is compatible with all Baby Trend strollers in the Expedition series. It's designed to expand and fit various baby stroller models. This inner tube features a straight valve and is intended for use on front wheels, providing long-lasting pneumatic performance. For Baby Trend Expedition or Navigator strollers, the bearings are crucial for fixing squeaky front wheels. If you experience wobbly tires or difficulty rolling or turning the front wheel smoothly, these replacement bearings can help restore normal function. Each product contains 2 bearings and is recommended to be used in conjunction with lubricant applied to both sides of the wheel cups and on the bearings themselves. A YouTube installation video can provide guidance on proper usage. The Baby Trend Expedition Stroller Replacement Ring Bearings are specifically designed for use in the front wheel, ensuring a smooth ride. These parts may also fit other Baby Trend models, but users should verify compatibility before purchase. If you can't find your stroller's instruction manual, there's a link where you can download it from the product type and model number. To get spare parts or repair services for your Baby Trend stroller, you can reach out to their customer support via phone, email, or postal mail. It's helpful if you provide them with the Model Number, Manufacture Date, and Date of Purchase when getting in touch, though it's not necessary. StrollerBoards is a family-run website where parents share practical solutions for baby travel gear based on their experience raising two kids.
