As far as armor goes, I'm really not very satisfied with it in general, if any body can offer any assistence or advice in this area, it'd be much appreciatid. Now onto som direct responsies! and the ores could use a bit of shading ect to make them look like they ar embedded in th rock. Very Nice, the ores could use a littel depth, But Wow. Done. Upcoming version. I wasn't intendant the ore blockz themselves to have a unique look that tiled among zem selves. It was my intention for ore blockz to just look like bits of ore/crystal to be sticking out of standard rock. I've really never considdered ore blockz as a building medium so much as an "item" you're hunting, thus they look like "collectible goodies" attached to and jutting from th normal rock surfice. Moving lava and water don't tile very good with stil lava and water, they look too diffrent. I would prefir if they looked the same just with the animation on the moving lava and water. As this is a realist pack, that's how they're intended to be. Realistikly Lava should have an even more drastic approach than what is currently being used. Still lava in safely habitable temperaturesshould actually be a greyish black, while flowing lava ranges from dark red to bright orange. I've no problem with people editin my stuff to suit thier needs. If you releaze it as a pack though, I'd appresheate credit. Can you pleez give me a 32x32 version of your pumpkin? I belive not shure if that only workz for me. Lookin good! And yeah, the enlarg linkz work fine.Suddenly, a wave of words washed over me... Finding the rhythm to turn this into a lyrical phrase...
