

FOR HAPPY, WELL-ADJUSTED, AND HARD-WORKING STUDENTS

IT STARTS IN THE MIDDLE

millennium
MIDDLE SCHOOL

EARLY ADOLESCENT EDUCATION FOR
5TH, 6TH, 7TH & 8TH GRADE ONLY

WELCOME TO OPPORTUNITY

Here at Millennium, we cultivate success through awareness, compassion, wisdom, and purpose, nurturing the unlimited potential and inner genius of young adolescents in a safe space for self-discovery and connection. Welcome to a vibrant community in which middle school students shape their journey.

Middle school is a time of incredible growth and potential

During these years, your child will:

- Form their identity
- Build crucial social skills
- Set the stage for future success

Adolescent brains work differently.

Your child's brain is changing rapidly. During middle school a child's frontal cortex development accelerates, presenting both challenges and opportunities for shaping their future. Our program blends creativity, self-awareness, critical thinking, and community involvement.

We're setting them up for a life of well-being, built on:

- Awareness
- Compassion
- Wisdom
- Purpose

OUR VISION

Three Pillars Framework

With a combination of rigorous academics, real-world experiences, and deep personal growth, the Three Pillars framework gives your child the opportunity to develop critical thinking skills, gain practical knowledge, and build the self-awareness necessary to thrive in an ever-changing world.

INSPIRED ACADEMICS

We go beyond traditional subjects, offering your child:

- A transdisciplinary curriculum that connects ideas across fields
- Hands-on approaches tailored to stimulate young minds
- Challenging content that prepares them for future academic success
- Your child will engage in thought-provoking “Quests,” tackling complex questions like “Are we alone in the universe?” or “How do I learn?”

EXPERIENTIAL LEARNING

We believe in learning by doing. Your child will:

- Explore professional environments through apprenticeships
- Participate in community service projects
- Experience nature through wilderness and camping trips
- Gain global perspective through travel programs
- These real-world experiences help your child develop practical skills and understand the impact of their actions on the world around them.

AUTHENTIC CONNECTIONS

We create a supportive environment where your child can:

- Develop self-awareness through mindfulness practices
- Build meaningful relationships with peers and mentors
- Explore personal identity and values in a safe space
- Through our unique “Forum” program, your child will learn essential social-emotional skills, preparing them for success in all areas of life.

A SCHOOL DAY FOCUSED ON ME

Welcome! I hope you'll come check out why this is the best place for 5th, 6th, 7th, and 8th graders. For now, let me tell you about my day. Follow me.

8:30 AM
MORNING MEETING

I get to school and join my friends before morning meeting. At 8:30 we line up and enter the nest for our morning meeting. We first take a moment of mindfulness led by a student before announcements and appreciations are shared.

8:45 AM
STEM QUEST

I go to my STEM quest for the next two hours. My partner and I are working on coding the robot we built to do different tasks. We are learning about the universe, our solar system and learning how to build and code a robot.

10:00 AM
BREAK

During movement breaks we choose what we do. This is a great time to get out of the classroom for a bit. Some kids are heading to the sports court; I'm catching up with some of my friends to talk about an apprenticeship opportunity we just heard about.

10:20 AM
STEM QUEST
CONTINUED

We gather around a big table to talk about why we think people go to space. We call this a "Harkness" discussion where our guides ask questions and we get to share our opinions and challenge each other's ideas. It gets pretty animated! Afterwards, we meet in our groups to start preparing for our Culmination.

11:10 AM
**LUNCH &
ACTION**

We eat lunch outside or on the sports court. I might talk with my friends or join in on a volleyball game. It's nice to have time out of class to play games, sports, and socialize with friends and guides.

11:50 AM
ADVISORY

During advisory time we have flexibility and independence. Some days we talk about advisory agreements, other days I do my homework while the guides are around for questions. This week, I'm also getting ready to lead my Student-Led Conference with my parents later this month. My advisor checks in with me too.

12:30 PM
**MATH, CE, PE,
& SPANISH**

Because it's Monday, I have Math, Creative Expression, and Spanish. This term I have visual art CE. This term we are learning how to make masks out of paper mache. Other terms I have dance or ukulele.

During Math we're working on puzzles and problem-solving with fractions. My last block class today is Spanish, which is always fun. I'm starting to understand the language without translating in my head.

3:30 PM
**WRAP-UP &
DISMISSAL**

That's it! Some of my friends head for home, while others stay for Millennium's aftercare. Today, I have Volleyball practice out on the Sports Court, and on Thursdays I check in with my guides during office hours. See you tomorrow!

FUTURE READY

Your decision to choose Millennium for middle school will have a lasting impact on your child as they grow into an adult. Our unique approach prepares students for high school—and for life.

ACADEMIC EXCELLENCE

After three years at Millennium, your child will be better prepared to:

- Excel in high school, thanks to our rigorous academic foundation
- Approach learning with curiosity and critical thinking skills
- Confidently tackle complex problems across disciplines

REAL-WORLD READINESS

Millennium graduates stand out for their ability to:

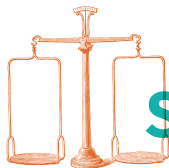

- Navigate real-world challenges with poise and adaptability
- Engage meaningfully in their communities
- Apply their learning to practical situations

PERSONAL GROWTH AND WELL-BEING

Your child will develop:

- Strong self-awareness and emotional intelligence
- Resilience in the face of challenges
- A clear sense of purpose and values

SOCIAL IMPACT

Millennium students are prepared to:

- Contribute positively to society
- Approach global issues with empathy and wisdom
- Lead with compassion and integrity

PARENT VOICES

Parents consistently report that their children thrive in high school and beyond.

They note their children's ability to:

- Take charge of their own learning
- Build strong, authentic relationships
- Approach life's challenges with confidence and creativity

By choosing Millennium, you're not just selecting a middle school – you're setting the stage for your child's lifelong journey of growth, learning, and positive impact on the world.

“OUR DAUGHTER WAS EXCITED TO GO TO SCHOOL EVERY DAY, MADE HUGE GAINS IN ANALYTICAL THINKING AND WRITING, AND WAS ACCEPTED TO HER FIRST-CHOICE HIGH SCHOOL.”
