

Mary Li

Senior Product Designer // Master's HCI + Design // BFA Game Design

maryli-ux.webflow.io | mary.limaniaya@gmail.com

Product designer and builder focusing on delivering AI-powered enterprise software, from customer discovery and workflow definition through implementation-ready design. Experienced in making complex operational systems clear, trustworthy, and scalable.

Didero AI Senior Product Designer

April 2026 - Present @ NYC

Leading design for Didero's AP product and building internal tooling that helps forward-deployed (FDE) teams deliver bespoke agentic software to legacy American manufacturers.

- Led a cross-functional team to research, design, and deliver Didero's first AP product for invoice management, shipping tested, engineering-ready prototypes for a phased rollout
- Building a plug-and-play design system with deployment leads and FDEs that speeds up delivery while maintaining product cohesion, responsiveness, and UX best practices
- Delivered a feature-rich internal demo kiosk and management tool (integrated usage logging, lead capture, story customization) to help the GTM team grow sales-lead volume at conferences
- Supporting sales and forward deployed teams with high-fidelity prototypes and internal tooling, including screen-recording utilities for demos

Google Cloud UX Designer

2021 - Dec 2025 @ SEA

Sole UX designer across multiple AI-powered enterprise cloud products, including Gemini chat and purchase enablement platforms. Partner closely with cross-functional teams to deliver platform-level features at scale.

- Led UX for [Gemini's](#) purchase and enablement surface, enabling self-serve access to Gemini for Google Cloud SKUs while bridging critical gaps in product management.
- Redesigned the [Recommendation Hub](#), improving recommendation discoverability for enterprise customers like MLB, driving optimization for cost and security.
- Updated the [Carbon Footprint Dashboard](#) for EU compliant reporting and created a carbon estimator tool to help engineers configure greener VMs
- Designed a consent manager UI for [FHIR](#) data sharing authorization within Cloud Healthcare

Internships 2018-2020

HTC Creative labs: Built first-time-user onboarding hand tracking experience for enterprise training

THAT (creative agency): Assisted creative team with concepting, workshop facilitation, and client pitches
