To Whom It May Concern,

Cosmo Cabinets builds kitchen and bath cabinetry in Eatonton, Georgia, on a 350,000-square-foot floor. We confirm that our cabinetry meets the certification requirements of the **Build America, Buy American (BABA) Act** for federal housing work.

Every cabinet ships from our plant in Eatonton, Georgia. More than **55% of the cost of components** in our cabinetry is sourced and processed inside the United States that clears the BABA threshold for manufactured products. We are also **KCMA, KCMA Severe Use and NGBS certified**, so the same product carries the certifications most federal and green-building specifications already call for.

We will provide any documentation needed to demonstrate compliance with the BABA act for your project.

For specifications, lead times, or pricing on federal housing scopes, contact us at the number or email us.

We are proud to provide Made in America cabinets for your project.

Best regards,

Cosmo Cabinets
