Private servers offer a more accelerated experience, with the tutorial deactivated and players starting at VIP 13 with bonuses such as increased connection bonus, unlocking heroic summons achievement, and more resources harvested through self-combat. ===== I can try to install Idle Heroes private server but I am not sure if it's worth it since it has ads. ===== The Private Server for Idle Heroes PS has been experiencing issues since the latest update, and many players are struggling to access their accounts. The server's Seasonal mode has been missing, and only Server S1 is available, causing inconvenience for players with accounts on both servers. It's beneficial to have certain heroes on your team, even at lower levels, such as Kroos, Rosa, Emily, Groo, Hearth Watcher, Sigmund, Valk, Aspen, Horus, and Aida, with the last five being capable of dealing significant damage. A good strategy is to save resources for specific events, and it's not necessary to complete every event fully. Once you reach Nightmare in Aspen, completing monthly events will become easier. When joining a guild, opt for one with at least 5 members and focus on hitting each boss to earn guild coins, aiming to be among the top 10 damage dealers. You can initially join a low-level guild and later switch to an end-game guild when you're stronger. To succeed in Brave Trial, concentrate on building one hero, as your enemies' power is based on your six strongest heroes. Keep other heroes at lower levels to make it easier to beat the trial daily. In the early and mid-game, this approach is simple, but it becomes more challenging once you've fully built two heroes. For the Tavern, start but don't complete 6-star and 7-star quests, saving them for the monthly event, and complete 4-star and 5-star quests as you progress. In the Arena, entering each week can yield small rewards, but avoid spending tickets on the Ironman arena until later in the game. Participate in events to earn rewards, and after a few months, you'll be able to complete most events. The Militants Event is relatively easy, even in the early game, so prioritize the Trial of Champions first. For the Gembox Event, purchase heroic scrolls and guild coin boxes if possible, and maxing your first E3's Guild Tech is a top priority. In the Aspen Dungeon, buy wishing coins and arena tickets with gold, and consider buying orbs only when necessary. At the Casino, keep the wheel on a desired hero and spin 8x daily for better deals. In the Market, purchase heroic scrolls, Casino chips, hero shards, and arena tickets with gold, as prophet orbs are sufficiently obtained from daily quests. =====
