The English language has a rich history of borrowing words from other languages, particularly during the Norman conquest when the ruling class spoke French and the lower classes continued to speak Old English. This led to the coexistence of synonyms like people and folk, freedom and liberty, or happiness and felicity. As linguist Simon Horobin notes, "the consequence of extensive borrowing is the creation of groups of synonyms occupying different registers." However, there's ongoing debate among linguists about whether two words can truly be synonymous, given that they often have slightly different meanings or contexts where one is preferred over the other. Linguists like David Crystal argue that lexemes rarely have exactly the same meaning and are influenced by stylistic, regional, emotional, or other factors. For instance, range and selection might be synonyms in a sentence about furniture, but differ significantly when discussing mountains. When two words have the exact same meaning, one often falls out of use as it becomes unnecessary or develops a different connotation over time. However, examining the definition of synonymy—words that mean nearly the same thing rather than exactly the same in every situation—the theory that synonymity is impossible might not hold up. The English language's inheritance and borrowing from various tongues have resulted in doublets like frail and fragile, or triplets like real, royal, and regal, each with distinct connotations based on their origins. Paul Dickson's book "Intoxerated" highlights the vast array of synonyms for the word "drunk," showcasing 2,964 options such as blind, blitzed, blotto, bombed, buzzed, hammered, high, or intoxicated, among others. This concept is further emphasized by various guidebooks and resources that offer advice on how to navigate complex situations, including business with NATO, as seen in the Finnish government agency Business Finland's publication. The importance of understanding word nuances is also reflected in the creation of various guidebooks, tour companies, radio shows, YouTube channels, and advocacy projects.
