These colorful balls stick together and build in ways that other toys cannot, making them a hit with kids. The possibilities are endless as they use imagination to create critters or board games. Creating a Bunchems board game is easy and fun for the whole family. To start, gather materials: 8.5" by 14" cardboard or foam board, scissors, glue, printable game board, markers, and dice. Begin by gluing the game board onto your chosen material and cutting it to size. Next, choose a marker from one of four options and color it in. Print on card stock for stability. Cut out and color the markers, then bend them under the feet of your chosen marker to stand. Finally, cut out and glue together the dice. To play, each player starts at the beginning circle. Roll the dice and move that many spaces, combining colors with numbers to build a snake. This game is perfect for practicing number recognition and counting skills, while also encouraging creative building and strategy. Bunchems are colorful balls that stick together, allowing kids to use their creativity and make various things. The BunchBot machine helps create these items with ease by squeezing the bunchems together. The box contains the machine, bunchems, a guide on making 19 different things, accessories like eyes, and an aid to push the bunchems out of the machine. To create something new, follow the step-by-step instructions in the guide, place the bunchems in the right columns, press the Bunchbot down after each row, and repeat until you've completed all the sequences. Once done, carefully pull your creation out and squeeze it to ensure everything sticks together properly. The girls loved playing with Bunchems and the Bunchbot, even at a young age, as long as they're under adult supervision. They found it strangely satisfying to see their creations come out of the machine. After completing the guide, kids can experiment and try to come up with their own unique creations.
