

E800LCD Fireplace

LCD Electric Fireplace Range

Model: E800LCD

Instructions for Use, Installation & Servicing

For use in the US (United States) and CA (Canada)

IMPORTANT

**THE HEATER OUTLET GRILLE BECOMES VERY HOT WHILE IN OPERATION.
DO NOT COVER THE OUTLET GRILLE OR ANY PART OF THE APPLIANCE.**

For use with 120V 60Hz electricity supply.
240V supply with hardwire installation only.

Please read these instructions carefully before installation.
Failure to follow them could result in serious injury.

SAVE THESE INSTRUCTIONS: Leave this manual with the appliance, they will be needed when maintenance or servicing is required.

THIS APPLIANCE MUST BE GROUNDED

WARRANTY

This product carries a 1 year warranty.

Please note that all warranties are effective from the date of purchase.

Full terms and conditions are detailed in the Warranty Statement on the Regency website www.regency-fire.com. In the event of any conflict of information the wording on the website shall prevail.

Important Note: Should any problems be experienced with your product, claims must first be submitted to the Dealer where the appliance was purchased from who will offer immediate assistance or contact Regency on your behalf.

Important : The hand-held transmitter is configured in the factory with a unique signal code. The hand-held transmitter is ready for use once the 2 AAA batteries are installed.
If the handset loses its signal or needs to be replaced, see chapter in the servicing section for details.

DISPOSAL

Recycle in accordance with Code of Federal Regulations (CFR), Title 40, Part 273. This device is classified as electrical and electronic equipment.

As such, it must not be disposed of with household waste.

At the end of its useful life please take this product to an appropriate recycling center or collection point. You can find your nearest recycling drop off point by contacting your locality's waste management office.

ELECTRICAL SUPPLY

A 120V 12.5A 60Hz supply is required

Rated power consumption: E800: 1400 Watts

Plan the location of the appliance so that it will have adequate electric power. A 15 AMP, 60Hz circuit is required for 120V installation. Additional appliances on the same circuit may exceed the current rating of that circuit. A dedicated circuit is not required, but is preferred to prevent circuit breaker trips or fuse failure.

Optional 240 VAC 2 phase 15A 60Hz supply can be utilized.

Rated power consumption:

E800: 2800 Watt

On 240 VAC option, this may only be hardwired.

IMPORTANT INFORMATION AND HEALTH AND SAFETY

WARNING: Improper installation, adjustment, alteration, service or maintenance can cause injury or property damage. Refer to this manual. For assistance or additional information, consult a qualified installer.

When using electrical appliances, basic precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

Read all instructions before using this appliance.

Use this appliance only as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock, or injury to persons.

DO NOT use outdoors.

NEVER use this appliance in **bathrooms, laundry rooms**, or any other location where the appliance could fall into a **bathtub or pool, become damp, or come in contact with water.**

This product is **not intended** to be a **primary heat source**. It is for supplemental heat only.

Do not locate the appliance immediately **below** a fixed receptacle outlet.

Electrical Supply Circuit Requirements

Plan the location of the appliance so that it will have adequate electric power. A 15 AMP, 60Hz circuit is required for 120V installation. Additional appliances on the same circuit may exceed the current rating of that circuit. A dedicated circuit is not required, but is preferred to prevent circuit breaker trips or fuse failure.

Do not cut the ground terminal off under any circumstances. When connected with 120 volts, the appliance must be electrically grounded in accordance with local codes, current version of CSA C22.1 (in Canada) or in the absence of local codes, with the National Electrical Code ANSI/NFPA 70-1987.

DO NOT operate any appliance with a **damaged cord or plug** or after the **appliance malfunctions**, has been **dropped** or **damaged in any manner**. Discard appliance, or return to authorized service facility for examination and/or repair.

This appliance is **hot when in use**. To avoid burns, **DO NOT** let bare skin touch hot surfaces. Keep **combustible materials**, such as furniture, pillows, bedding, papers, clothes, and curtains at least **3.3 feet (1.0 m)** from the **front of the appliance**.

Extreme caution is necessary when any appliance is used by or near **children or invalids** and whenever the appliance is left **operating and unattended**.

DO NOT insert or allow foreign objects to enter any ventilation or exhaust opening, as this may cause **electric shock or fire**, or **damage the appliance**.

To prevent a possible fire, **DO NOT** block air intakes or exhaust in any manner. Doing so could cause a **fire**. **DO NOT** use on soft surfaces, like a bed, where openings may become blocked.

As the appliance has **hot and arcing or sparking parts inside**. **DO NOT** use it in areas where **gasoline, paint, or flammable liquids** are used or stored.

AVOID FIRE! Regularly inspect all air vents to make sure they are free from dust, lint, or other blockage. **Unplug the unit** and clean with a **vacuum ONLY**. **DO NOT** rinse or get wet.

DO NOT USE this appliance with any **solid state speed control devices**.

Risk of electric shock! DO NOT OPEN! No user-serviceable parts inside!

NEVER modify this appliance. Doing so could result in personal injury or property damage. Modification of this fireplace **completely voids all warranties**.

NEVER leave this appliance unattended. To disconnect appliance, ALWAYS turn controls to "OFF" then remove plug from outlet or turn off circuit when not in use.

ALWAYS turn this appliance off before unplugging it from the outlet.

To prevent a possible fire, do not burn wood or other materials in this **appliance**.

ALWAYS disconnect this unit from the **power supply before** performing any assembly or cleaning, or before relocating the electric fireplace.

Always use properly grounded, **fused** and polarized outlets.

Always use ground fault protection where required by electrical code.

Avoid use of an **extension cord** because an extension cord may overheat and cause a fire. If you have to use an extension cord, the cord should be **N.14 AWG minimum size** and rated to not less than 1875 Watts.

NEVER plug this appliance into an outlet that is **old, cracked**, or has any loose wires or connections. Plugging this appliance into a faulty outlet could result in **electric arcing** within the outlet that could cause the **outlet to overheat or catch fire**.

DO NOT run **power cord** under carpeting. **DO NOT** cover power cord with throw rugs, runners, or similar coverings. **DO NOT** route power cord under furniture or appliances. Arrange power cord **away from traffic** area, and where it will not be tripped over.

ALWAYS check your appliance cord and plug connections with **each use!**

- A. **MAKE SURE** the plug fits tight in the outlet! Faulty wall outlet connections or loose plugs can cause the outlet to overheat.
- B. **Appliances draw more current** than small appliances. **Overheating** may occur even if it has not occurred with the use of other appliances.
- C. During use **check frequently** to see if the **plug outlet is HOT!** If the outlet or faceplate is **HOT, discontinue use immediately** and have a qualified electrician inspect and/or replace the faulty outlets.

WARNING: Cancer and Reproductive Harm

SAVE THESE INSTRUCTIONS.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment should be installed and operated with a minimum distance 8" (203 mm) between the radiator and your body. Refer to next page for a copy of the serial decal.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- (1) this device may not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

This appliance has been approved to the following standards:

- **ICES-003:Issue 6** - Information Technology Equipment (Including Digital Apparatus) -- Limits and Methods of Measurement
- **ANSI C63.4:2014** - American National Standard for Methods of Measurement of Radio-Noise Emissions from Low-Voltage Electrical and Electronic Equipment in the Range of 9 kHz to 40 GHz
- **ANSI C63.10:2013** - American National Standard of Procedures for Compliance Testing of Unlicensed Wireless Devices
- **47 CFR Part 15, Subpart B** - Radio Frequency Devices
- **47 CFR Part 15, Subpart C 15.231** - Radio Frequency Devices
- **C22.2 No 46-13** - Electric Air Heaters
- **UL 2021 (4th Edition)** - Fixed and Location-Dedicated Electric Room Heaters.

This device complies with Part 15 of the **FCC regulations**. Operation is subject to two conditions:

1. It must not cause harmful interference.
2. It must accept any interference, including that which may cause undesired operation.

Unauthorized modifications may void the user's authority to operate this equipment.

Notice: This device has been tested and complies with Class B digital device limits under Part 15 of the FCC rules, designed to protect against harmful interference in residential installations. It may generate, use, and emit radio frequency energy, and improper use or installation may cause interference with radio communications. Interference is not guaranteed to be prevented in all situations.

If interference occurs, it may be resolved by:

- Reorienting or relocating the receiving antenna.
- Increasing the distance between the device and receiver.
- Connecting to a different circuit than the receiver.
- Consulting with a dealer or qualified technician.

Important: The device and its antenna(s) must not be co-located with or operated alongside any other antenna or transmitter.

Certificate of Compliance

This product is eligible to bear the CSA mark shown with the adjacent indicators "C" and "US" noting compliance.

This is a copy of the label that accompanies each E800 Electric Fireplace. We have printed a copy of the contents here for your review.

NOTE: Regency® units are constantly being improved. Check the label on the unit and if there is a difference, the label on the unit is the correct one. The serial # will be 9 digits beginning with prefix of 624.

OPERATING INSTRUCTIONS

WARNING! Do not operate the appliance if it is damaged or has malfunctioned. If you suspect the appliance is damaged or has malfunctioned call a qualified service engineer to inspect the appliance, and replace any part of the electrical system if necessary, before reuse.

Do not disconnect the power at the main supply while the appliance is running. Use the functions on the remote to turn the fire off and ensure the main switch has been moved to the off position before disconnecting.

MANUAL CONTROL PANEL

1. Power On/Off button
2. Flame On/Off button
3. Heater On/Off button
4. Wi-Fi Indicator

OPERATING THE APPLIANCE

Press 1 to turn the appliance on/off.

Press 2 to turn flames on/off.

Press 3 to turn the heater on/off.

REMOTE CONTROL

The remote control should be left on a flat surface in the room where the appliance is installed and away from any direct flow of hot air.

IMPORTANT: If operating the appliance using the remote control provided, do not touch the following buttons on the control panel. (1. Power On/Off 2. Flame On/Off button 3. Heater On/Off) These 3 buttons on the control panel are only to be used when operating the appliance in manual mode without use of the remote control.

REMOTE CONTROL

The remote control should be left on a flat surface in the room where the appliance is installed and away from any direct flow of hot air.

Operation Buttons

-  - Power
-  - Favourites
-  - Heater
-  - Timer
-  - *Increase
-  - *Decrease
-  - Color Preference (Ember Lights)
-  - Color Preference (Ember Lights)
-  - Top light
-  - Ember light
-  - Volume
-  - Mood light
-  - Flame

*Increases or decreases heater settings, sound, top lights, ember bed, timer.

Operation Display

 - Brightness Level / Volume

0.5 H - Timer

ROOM
18 C - Actual Room Temperature

SET
15 C - Temperature Setting

NOTE: To Reset to Initial Settings, please refer to page 12 of this manual.

CHANGING BETWEEN FAHRENHEIT & CELSIUS

To switch between Fahrenheit (°F) and Celsius (°C), press the heater button  for 3 seconds to trigger a long beep sound.

OPERATING THE APPLIANCE - ADVANCED OPERATION

POWER

Initial Startup

Press the main power button  to turn on the fireplace. All settings will be in their initial status:

Flame: Option 1

Top Light: On, Brightness Level 5

Ember Light: On, Brightness Level 5, Orange

Heater: Off

Volume: On, Level 4

Subsequent Operations

After the initial startup, when the power is off, press the main power button once to turn on the fireplace. All settings will revert to the last operation status.

Power On

When the power remains on, the remote screen will continuously display icons representing the functions that are currently active.

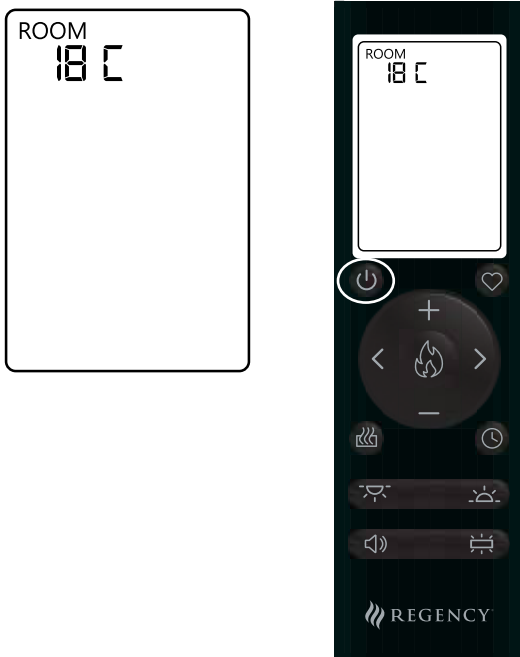

Power Off

To power off the device, press the main power button  once. One short beep sound will indicate that the device is powering off. The remote control display will subsequently turn off most of the icons and display only the room temperature.

Standby Mode

If the remote is inactive for 10 seconds or longer, the remote screen will switch to standby mode.

HEATER

IMPORTANT

Heater Mode Operation

When the appliance heater is turned on, there will be two temperatures displayed. Both ROOM (top left hand corner of the remote screen) and SET (top right hand corner of the remote screen). Unlike typical thermostats/remote thermostats, the ROOM temperature on the remote will not change regardless of any temperature change that occurs in the room where the remote is located as the remote goes into a sleep mode. The only way to see if the ROOM temperature has changed would be to press any button on the remote to wake up the remote. Importantly, the unit's actual temperature control is managed by an internal sensor located beneath the ember bed. This sensor does not communicate with the remote, which is why the displayed ROOM temperature on the remote has no impact on how the appliance functions. Once the internal sensor detects that the set temperature (with a $\pm 2^\circ$ variance) has been reached, the heater will shut off. The blower fan will continue to run for an additional 30 seconds and then will also shut off.

Turn on the Heater

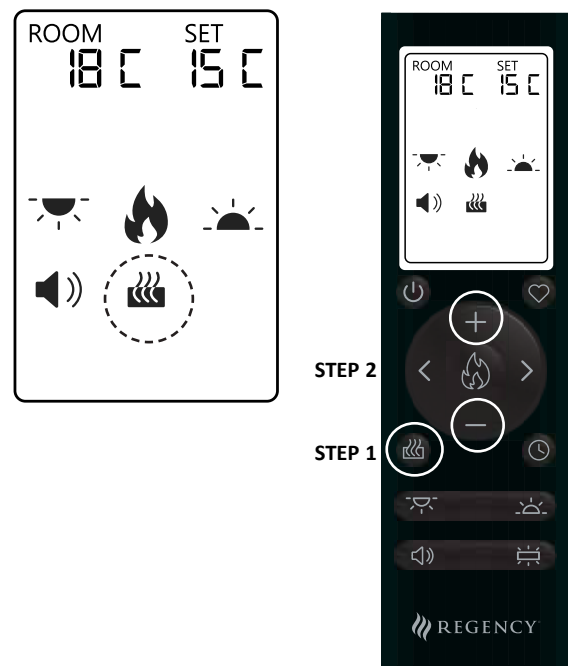

STEP 1 - Press the heater button to turn on the heater mode. The remote LCD will display the heater icon .

STEP 2 - Use the **+** and **-** buttons to adjust and set the preferred temperature.

Turn off the Heater

When the heater is on, press the heater button again to turn it off.

The heater icon will disappear from the remote LCD. All other functions will remain unchanged.

FLAME

Change Flame Style

STEP 1 - Press the Flame button  to activate the flame adjustment mode.

STEP 2 - Use the **<** and **>** buttons to navigate and select your preferred flame style. There are a total of 9 flame styles available.

Change Flame Brightness

STEP 1 - Press the  button to activate the flame adjustment mode.

STEP 2 - Use the **+** and **-** buttons to navigate and select your preferred flame brightness. There are 5 brightness levels available, and off mode.

FLAME SOUND

Adjust Volume:

STEP 1 - Press the  button to activate the sound adjustment mode.

STEP 2 - Use the **+** and **-** buttons to navigate and select your preferred flame sound level. There are 5 sound levels available, and off mode.

TOP LIGHT

Change Top Light Brightness

STEP 1 - Press the  button to activate the top light adjustment mode.

STEP 2 - Use the **+** and **-** buttons to navigate and select your preferred brightness level. There are 5 brightness levels available, and off mode.

EMBER LIGHTS

Change Ember Light Colour

STEP 1 - Press the  button to activate the ember light adjustment mode.

STEP 2 - Use the  and  buttons to navigate and select your preferred color option. There are 14 color options in total.

Change Ember Light Brightness

Press the  button to activate the ember light adjustment mode.

Use the  and  buttons to navigate and select your preferred brightness level. There are 5 brightness levels available, and off mode.

STEP 2

STEP 1

TIMER

STEP 1 - Press the  button to activate the timer.

STEP 2 - Use the  and  buttons to set the timer to one of the following options: 0.5h, 1h, 2h, 3h, 4h, 5h, 6h, 7h, 8h, 9h, 10h or Off.

The remote screen will automatically return to the operating status display after 10 seconds of inactivity.

STEP 2

STEP 1

FAVOURITES

Change Favourite Mode

STEP 1 - Press the  button to activate the favourites mode. Press the favorites button to switch between Favorite Mode options: 1, 2, 3, or Off. The favorite sign and its option number will be displayed.

In Off mode, all settings will revert to the last operation status.

STEP 1

Overwriting Favorite Mode 1,2 and 3:

STEP 1 - Select the favorite mode 1, 2, or 3 that you wish to overwrite. With this mode selected, make the desired adjustments using the flame option, flame brightness, flame burning sound level, ceiling light brightness, and ember bed and log light color and brightness according to your preference.

STEP 2 - Long press the Favorite Mode  button for 3 seconds. A long beep will indicate that your preference has been saved and will overwrite the previous configuration in the chosen Favorite option.

STEP 2
(3 sec)

STEP 1

RESET

Reset to Initial Settings:

STEP 1 - Press and hold for 3 seconds the  button to reset the unit.

To reset all settings to their initial mode:

Flame: Option 1

Top Light: On, Brightness Level 5

Ember Light: On, Brightness Level 5, Orange

Heater: Off

Volume: On, Level 4

STEP 1
(3 sec)

MOOD LIGHT (OPTION)

Mood Light Adjustment Mode:

short press to turn on and off the mood light

STEP 1 - Press and hold for 3 seconds to activate the mood light adjustment mode.

Color Option:

STEP 2 - Use the  and  buttons to navigate and select your preferred color option.

There are 14 color options in total include light off.

Change Brightness:

Use the  and  buttons to navigate and select your preferred brightness level.

There are 5 brightness levels available, and off mode.

NOTE: Mood Light is Not included. Only when mood light is installed this function will be available.

Must be purchased separately.

STEP 2

STEP 1

BATTERY REPLACEMENT

Ensure that the handset batteries are new and inserted correctly.

The Remote requires two 1.5V alkaline AAA batteries.

Ensure the correct polarity.
Do not short circuit the terminals.

Do not attempt to recharge non-rechargeable batteries.

Remove rechargeable batteries before charging.

Do not mix old and new batteries.

Remove batteries if the appliance is not used for long periods.

Changing the batteries will not affect the Timer settings.

MAINTENANCE

ENSURE THE APPLIANCE IS TURNED OFF BEFORE CLEANING.

GLASS CLEANING

Wipe the glass viewing panel with a damp cloth and buff with a lint free duster.

Caution: Do not use abrasive cleaners on the glass panel. Do not spray liquids directly onto any surface of the unit.

CLEANING AIR INLETS

Clean the air inlet and outlet grilles regularly with a soft cloth or the nozzle of a vacuum cleaner.

Dust build-up can inhibit efficient performance of the fan and lead to the safety cut-out operating.

Keep the area around the appliance clean and free of fluff, dust or pet hair.

In particular, build-up of dust etc. can occur around the heater area. Take particular care to keep this area free from such particles on a regular basis to prevent build-up.

INSTALLATION

GENERAL

TOOLS REQUIRED

A Screwdriver, Level, and Drill will be needed.

UNPACKING THE FIREPLACE

WARNING! DO NOT use this appliance if any part has been exposed to water.

Immediately call a qualified service technician to inspect and to replace any part of the electrical system if necessary.

Open the packaging carefully and remove the polystyrene. Remove and discard the plastic bag. Keep plastic wrapping away from children. Be responsible when handling the packing materials.

Check all parts and accessories are removed before disposing of any packaging. If necessary keep the original packaging for future transport and/or storage. Test the appliance before installation.

FITTING THE APPLIANCE

LOCATING THE E800 LCD

Your new E800LCD may be installed virtually anywhere in your home. However, when choosing a location ensure that the general instructions are followed.

For best results, install out of direct sunlight.

The heater should ideally be fitted into/onto an internal flat wall constructed from either wood framing and drywall/brick, etc. The fixings provided are for use on masonry fireplace ONLY. Please ensure that suitable fixings are used when securing to any hollow or purpose built cavity. This may also be installed into a masonry fireplace as long as it meets the requirements as per below.

NOTE: This appliance is not suitable for fitting to a Cavity Wall, backing on to an outside wall, an open chimney or any opening that may be subject to damp and draft, unless adequate precautions are taken to avoid the appliance coming into contact with moisture or excessive drafts.

Into Framed construction: For exterior/outside walls, insulate the enclosure to the same degree as the rest of the house, apply vapor barrier and drywall, as per local installation codes. Do not insulate the appliance itself.

Into masonry chimneys: The flue damper must be fully blocked if safe to do so for installation of the unit. Ensure the fireplace and chimney are clean and in good working order, and that all chimney clean-outs are tight-fitting and not permitting air into the chimney. Install a sealed vent cap and metal flashing at the top of the masonry chimney to prevent water leaks and air movement within the cavity. Do not insulate the appliance itself.

Make sure there are no pipes or cables behind the area to be drilled or cut.

Always ensure the appliance is adequately supported and sits on a firm structure when mounting above floor level.

IMPORTANT: It is highly recommended to complete finishing of the wall fully prior to sliding the appliance into final position. Once the rough in framing & the finishings materials have been completed and power has been routed to the right hand side of the recess in the wall, the appliance may be slid into its final position. This will allow ease of installation and for servicing if ever required in future.

WIRING KITS

This appliance is supplied with a 3 prong plug with a 93.3" (2.37m) lead.

Power for this appliance will be located on the right hand side if facing the appliance from the front.

Note: Must be plugged into a 3 prong receptacle which is exposed and accessible. Do not under any circumstances, cut the ground on the 3 prong plug.

This appliance is for use on 120 Volts only with the supplied power cord. The cord has a plug as show in (A). An adapter as shown in (C) is available for connecting three-blade grounding type plugs to two slot receptacles. The green grounding lug extending from the adapter must be connected to a permanent ground such as a properly grounded outlet box. The adapter should not be used if a three-slot grounded receptacle is available.

The appliance should ideally be located close to a suitable receptacle to enable connection. An extension could be run from an existing socket outlet but this must be carried out by a suitably qualified electrical engineer. The electrical socket must be easily accessible to allow disconnection when the appliance is fitted. If the power cord is damaged, it must be repaired by the authorised service centre or professional person.

Ensure that curtains and furniture are not positioned close to the chosen position, as this would create a potential fire hazard or block the heater outlet ducts.

WARNING! KEEP ALL COMBUSTIBLE MATERIALS AT LEAST 1M (3.3 FEET) FROM THE FRONT OF THE ELECTRIC FIREPLACE.

To disconnect the appliance, turn the controls to off, then remove plug from outlet.

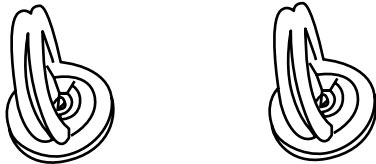

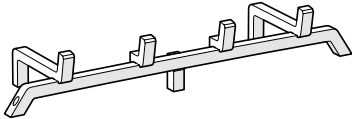

This appliance must be connected and grounded in accordance with local codes, if hard wired. In the absence of local codes, the use the current CSA C22.1 CANADIAN ELECTRICAL CODE in CANADA or the current ANSI/NFPA 70 NATIONAL ELECTRICAL CODE in the UNITED STATES.

HARDWIRING

This appliance can also be hardwired. See HARDWIRED INSTALLATION within this manual for details.

INCLUDED ITEMS

E800LCD:

- 1 Remote control	
- 2 AAA Batteries	
- 2 Suction Cups for glass removal	
- 1 Ember bed (pre-installed with the unit)	
- 1 Instruction manual	
- 1 Grate	

SERVICING REQUIREMENTS

DURING SERVICING OF THIS APPLIANCE IT MAY BE NECESSARY TO CUT CABLE TIES IN ORDER TO ACCESS AND REMOVE SOME OF THE PARTS. THESE MUST BE REPLACED WHEN REASSEMBLING THE APPLIANCE.

THIS APPLIANCE MUST ONLY BE SERVICED BY A SUITABLY QUALIFIED PERSON. BEFORE UNDERTAKING ANY WORK ON THE APPLIANCE: SWITCH OFF THE APPLIANCE AND ISOLATE THE POWER SUPPLY ENSURING THERE IS NO POWER TO THE APPLIANCE.

Wait for at least 10 minutes until the appliance has cooled down.

Remote Handset Battery Replacement

Replace with 2 AAA batteries. Make sure the batteries are installed correctly in the remote control.

Resetting the Thermal Cutout Switch

The appliance is fitted with an Electronic Safety Control (E.S.). This is a safety device which switches off the fire if the appliance overheats for any reason e.g. when covered.

If the heater stops operating while the flame effect continues normally, this indicates that the E.S. Control is in operation.

The E.S. Control can only be re-set after the appliance has cooled down.

To re-set the E.S:

Switch off the appliance (Manual On/Off switch) and leave for approximately 120 minutes.

Remove any obstruction to the fan heater outlet or other internal parts.

Switch on appliance and the E.S. Control will re-set. Ensure that the appliance is functioning correctly. If the E.S. Control operates again, the appliance should be checked by a competent Electrician.

TECHNICAL SPECIFICATION

UNIT DIMENSIONS

DIMENSIONS	A	B	C	D*	E	F	G	H	I
E800 LCD	889 mm (35 in)	881 mm (34-11/16 in)	302 mm (11-7/8 in)	295 mm (11-5/8 in)	847 mm (33-3/8 in)	857 mm (33-3/4 in)	19 mm (3/4 in)	863 mm (34 in)	2370 mm (93-5/16 in)

For use with 120 VAC 60 Hz 3 prong plug (supplied) or 120 VAC 60 Hz hardwire option.

240 VAC power supply with hardware installation only.

Note: The wiring from the appliance to the breaker must be supplied by a qualified electrician. This is not supplied with the appliance.

For use with 120V 60Hz electricity supply.

240V supply with hardwire installation only.

ELECTRICITY SUPPLY

A 120V 12.5A 60Hz supply is required.

Rated power consumption:

E800LCD: 1400 Watts

Optional (Hardwire only) 240V 2 phase 15A 60Hz supply can be utilized.

Rated power consumption:

E800LCD: 2800 Watts

THIS APPLIANCE MUST BE GROUNDED.

IMPORTANT: A 15 AMP, 60Hz circuit is required for 120 VAC installation. Additional appliances on the same circuit may exceed the current rating of that circuit. A dedicated circuit is not required, but is preferred to prevent circuit breaker trips or fuse failure. Optional 240 VAC 2 phase may only be hardwired. FAILURE TO ADEQUITLY POWER APPLIANCE AT REQUIRED VOLTAGE AND AMPERAGE WILL VOID YOUR WARRANTY.

A 3 prong plug with 93.3" (2.37m) power lead and a separate hard wiring kit are supplied.

2 x Remote control handset battery (AAA).

Note: The wiring from the appliance to the breaker must be supplied by a qualified electrician. This is not supplied with the appliance.

INSTALLATION INSTRUCTIONS

MASONRY FIREPLACE

WOOD FRAMING

MINIMUM OPENING SIZE			
Dimensions	A	B	C
	34-11/16" (881 mm)	33-15/16" (862 mm)	12-3/4" (324 mm)

NOTE: SEE MINIMUM FIREPLACE OPENING SIZES WITH 3-SIDED AND 4-SIDED FINISHING TRIM OPTIONS. SEE PAGE 21 FOR DETAILS.

IMPORTANT: It is highly recommended to complete finishing of the wall fully prior to sliding the appliance into its final position. Once the rough in framing & the finishings materials have been completed and power has been routed to the right hand side of the recess in the wall, the appliance may be slid into its final position. This will allow ease of installation and for servicing if ever required in future. Also see **FITTING THE APPLIANCE** in this instruction manual.

Electrical Receptacle in a Masonry Fireplace/Wood Framing

The electrical receptacle (if permitted) can be placed on the left or right side of the unit within the masonry/wood framing enclosure, respecting the following conditions:

1. Distance from the receptacle face to the insert minimum 3" (76 mm).
2. Height from the top of the receptacle to the floor of the fireplace: maximum 3.5" (89 mm).
3. The receptacle box and receptacle cover must be made of metal.
4. Where the 120-volt power cord exits toward the receptacle, it must not come into contact with the back or sides of the fireplace. When installed, this appliance must be grounded in accordance with local codes, or in their absence, the National Electrical Code ANSI/NFPA 70, or the Canadian Electrical code CSA C22.1.

IMPORTANT: Check with your local inspector before starting this installation, as some jurisdictions may not allow placement of this receptacle within a masonry chimney/Fireplace/wood framing.

Note: Ensure that the appliance is sitting on a solid continuous surface which is the full width and depth of appliance and is level.

Finishing Materials (Wood Framing)

Combustible or non-combustible finishing materials may be used to finish up to the fireplace.

DO NOT PACK THE VOID AROUND OR ABOVE THE APPLIANCE WITH INSULATION OR MINERAL WOOL.

NOTE: In order to avoid the possibility of exposed insulation or vapour barrier coming into contact with the appliance body, it is recommended that the walls of the appliance enclosure be "finished" off with drywall/sheetrock as you would finish any other outside wall of a home. This will ensure that clearance to combustibles is maintained within the cavity.

Once the opening has been prepared and the power has been routed to the right side (if hardwiring) of the appliance, follow steps below.

- A. Remove the glass front (See glass front removal)
- B. If leveling legs are required this should be installed with the bolts provided.
- C. If hardwiring, the electrical connections must also be made prior to placing the appliance into opening.
- D. Level the appliance and slide insert into its final position
- E. Install the log set
- F. Reinstall the glass front.
- G. Plug 3 prong plug into a suitable receptacle or if hardwired, turn breaker on.

MINIMUM FIREPLACE OPENING SIZES WITH 3-SIDED AND 4-SIDED FINISHING TRIM

Faceplate	Dimensions			
	Min Install Width (A)	Min Install Height (B)	Min Install Depth (C)	Min Rear Width (D)
3 Sided Finishing Trim*	34-11/16" (881 mm)	33-15/16" (862 mm)	12-3/4" (324 mm)	34-11/16" (881 mm)

* Bottom trim from 4-sided finishing trim is removed to create a 3-sided finishing trim.

Faceplate	Dimensions				
	Min Install Width (A)	Min Install Height (B)	Min Install Depth (C)	Min Rear Width (D)	**Min Install Height (E)
4 Sided Finishing Trim	34-11/16" (881 mm)	33-15/16" (862 mm)	12-3/4" (324 mm)	34-11/16" (881 mm)	3/4" (19 mm)

**** IMPORTANT FINISHING DETAIL NOTE:** Before placing unit into final position - it is important to know the total thickness / height of finished floor (tile, wood flooring, carpet, etc.) The base of the 4 sided finishing trim must be level or higher than the finished floor.

MANTEL CLEARANCES

Combustible mantel clearances from top of finishing trim are shown in the diagram below.

	A	B	C	D
Dimensions	881 mm (34-1/2 in)	235 mm (9-1/4 in)	140 mm (5-1/2 in)	25 mm (1 in)

Note: Ensure the paint that is used on the mantel and the facing is "heat resistant" or the paint may discolour.
Measurement (A) is shown with 3 sided finishing trim.

LEVELING LEGS

NOTE: The leveling of the appliance must be done prior to sliding appliance into final position.

The leveling legs which are supplied must be installed from below the unit as shown. Rest appliance on its back and secure 6 legs as shown above. Once it is in position, adjust the legs to ensure the appliance is level and won't rock.

FRONT GLASS REMOVAL INSTRUCTIONS

REMOVING GLASS FRONT

1. Carefully use the glass suction cup provided to remove the glass. First, lift the glass to clear the bottom edge.

2. Swing the bottom edge of the glass out.

3. Swing the top edge of the glass down and out.

4. To reinstall glass, reverse steps 1-2. Ensure the suction cup is safely stored away for future use.

Note: The glass should only be installed once all the optional accessories and media have been installed and appliance is in final position.

Note: When stripping back the wires ends from the BX cable, they should be stripped back appropriately 1/2" (13 mm) for both 120VAC or 240VAC applications.

FOR 120VAC APPLICATIONS:

The following instructions must be followed to install a 3-wire Romex cable to the terminal.

1. Connect the voltage line (black) to the L1 terminal.
2. Connect the neutral wire (white) to the N terminal.
3. Connect the ground line (green) to the ground terminal.
4. Make sure that no wire is connected to the L2 terminal.

FOR 240VAC APPLICATIONS:

IMPORTANT: When wiring 240VAC with only 3 wires, not 4 will damage the appliance.

The following instructions must be followed to install a 4-wire Romex cable to the terminal.

1. Connect the voltage line 1 (black) to the L1 terminal.
2. Connect the voltage line 2 (red) to the L2 terminal.
3. Connect the neutral line (white) to the N terminal.
4. Connect the ground line (green) to the ground terminal.

FOR ALL APPLICATIONS:

IMPORTANT

Ensure all connections are right and there are no exposed wires. Tighten Romex strain relief and reattach junction box cover plate.

Inspect that the correct voltage is selected on the selector switch located inside the unit. Failure to do so could damage the product.

Replace terminal block cover plate and retaining screws.

COMPLETING THE INSTALLATION

This appliance comes standard with a 4 sided finishing trim. The appliance can be installed with the 4 sided finishing trim only or as a 3 sided by removing the bottom trim. See below.

Uninstall the bottom trim by removing these 3 screws. See below. The bottom trim is not required and may be recycled along with the 3 screws.

Also offered are the flush faceplate, backing plate & custom backing plate which can be used to cover openings which are larger than the 3/4 sided finishing trim or to enhance appearance.

OPTIONAL LED MOOD LIGHTING KIT (PART #923-835)

The appliance can be enhanced by an optional LED Mood Lighting Strip. This comes with 10' (3 m) of LED mood lighting and can be operated using the remote control provided with this appliance. A second LED mood kit strip may be obtained if more than 10' (3m) is required. This can be connected to the end of the first LED lighting strip or by using the splitter that is provided with the kit. A maximum of 3 kits is permitted.

Contents

Installation

- 1 Locate pigtail on right hand side of appliance. Connect other end of LED mood lighting kit to the pigtail as shown below.

- 2 Cut LED strip to desired length. Ensure cut line is as per below.

- 3 Peel adhesive from back side of LED strip.

- 4 Stick the LED strip on the desired surface, as shown below.

Maximum Length: ≤20'/6m

- Option 1 Maximum 20' (6m) with no splitter required. If more than 10' (3m) is required a second 923-835 LED Mood Lighting Strips would need to be purchased.

- Option 2 Maximum 20' (6m) using supplied splitter. 2 x 923-835 LED Mood Lighting Strips required.

- Option 3 Maximum 20' (6m) with splitter from the original kit & additional splitter from second LED mood lighting strip kit purchased. 3 x 923-835 LED Mood Lighting Strips required.

- Option 4 Not permitted. 10'/3m + 10'/3m + 10'/3m = 30'/9m > 20'/6m. An X indicates this is not permitted.

Example 2 x 923-835 Mood Lighting strip kit & 1 x splitter and 1 x wiring from appliance to LED mood lighting used. See below.

OPTIONAL BROWN BRICK PANEL (PART #544-901)

Important: Brick panels must be installed prior to installing the appliance into the finished wall.

Brick panel installation guide.

Before you begin keep the area around the appliance clean.

1. Pull out the unit and disconnect the power cord or if hardwired, shut off breaker to appliance.
2. Carefully use the glass suction lifter provided to remove the glass. Remove the front glass of the unit, as shown in illustrations A, B and C.

3. Remove the log set and ember bed. Ensure that the logs are repositioned in the same orientation at the end of the process.

4. With the logs and ember bed removed, remove the three screws on the side of the unit, as shown in the image below.

5. After removing the screws, rotate the black brick panel and pull it out as shown in illustrations D and E. Repeat step to remove black brick panel for the right side.

6. Install the new brown left & right brick panel and attach with the screws removed in step 4. Hold the brick panel to reinstall.

7. With the panels installed, place the ember bed and log set back into the unit. Plug the unit into the power outlet, and position it in its original location.

Follow steps F, G, H below to install the front glass back inside the channel, in it's original position.

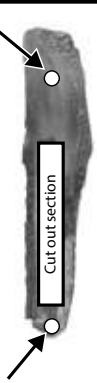

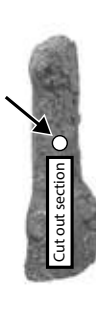

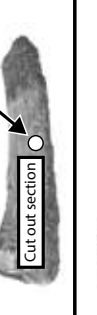

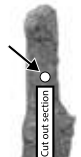

OAK LOG SET (PART #544-954) AND DRIFTWOOD LOG SET (PART #544-950) - INSTALLATION WITH GRATE

Oak log shown steps are also applicable for driftwood log set.

BEFORE YOU BEGIN LOG SET INSTALLATION:

1. Ensure you attach the round adhesive pads as indicated by the arrows in the table below.
2. The adhesive pads should be applied to the bottom of the logs to assist with assembly and proper positioning.

Log A (x1)		Log B (x1)		Log C (x1)		Log D (x1)		Log E (x1)		Log F (x1)	
Top View	Bottom View	Top View	Bottom View	Top View	Bottom View	Top View	Bottom View	Top View	Bottom View	Top View	Bottom View
											

Log set installation guide with grate.

1. Position log C as shown.
Ensure that the flat face on the bottom of the log C is facing downward onto the emberbed and the S end of the log is pointing towards the front center of the ember bed. Place the grate as shown below.

2. Position log A as shown.

Ensure that the cut out section on the bottom of the log A is facing downward onto the emberbed and the N end of the log is pointing towards the back corner right of the ember bed.

3. Position log F as shown, resting behind log A.

Ensure that the cut out section on the bottom of the log D is facing onto the screen and the S end of the log is pointing towards the front right corner of the ember bed.

4. Position log B as shown, resting against log A.

Ensure that the cut out section on the bottom of the log B is facing downward onto the emberbed and the N end of the log is pointing towards the back corner left of the ember bed.

5. Position log D as shown, resting against log A. Ensure that the cut out section on the bottom of the log D is facing downward onto the emberbed and the S end of the log is pointing towards the front right corner of the ember bed.

6. Position log E as shown, resting against log B. Ensure that the cut out section on the bottom of the log E is facing downward onto the emberbed and the S end of the log is pointing towards the front left corner of the ember bed.

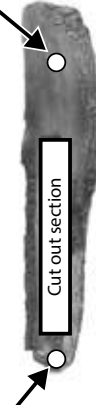

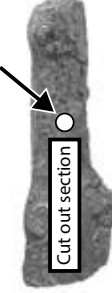

Oak or Driftwood log layout complete as shown above.

OAK LOG SET (PART #544-954) AND DRIFTWOOD LOG SET (PART #544-950) - INSTALLATION WITHOUT GRATE

Oak log shown steps are also applicable for driftwood log set.

BEFORE YOU BEGIN LOG SET INSTALLATION:

1. Ensure you attach the round adhesive pads as indicated by the arrows in the table below.
2. The adhesive pads should be applied to the bottom of the logs to assist with assembly and proper positioning.

Log A (x1)		Log B (x1)		Log C (x1)		Log D (x1)		Log E (x1)	
Top View	Bottom View	Top View	Bottom View	Top View	Bottom View	Top View	Bottom View	Top View	Bottom View
									

Log set installation guide without grate.

1. Position log A as shown.
Ensure that the cut out section on the bottom of the log A is facing downward onto the emberbed and the N end is pointing towards the front center of the ember bed.

2. Position log B as shown, resting against log A. Ensure that the cut out section on the bottom of the log B is facing downward onto the emberbed and the N end of the log is pointing towards the back corner right of the ember bed.

3. Position log C as shown. Ensure that the flat face on the bottom of the log C is facing downward onto the emberbed and the S end of the log is pointing towards the front center of the ember bed.

4. Position log D as shown, resting against log A. Ensure that the cut out section on the bottom of the log D is facing downward onto the emberbed and the S end of the log is pointing towards the front right corner of the ember bed.

5. Position log E as shown, resting against log B. Ensure that the cut out section on the bottom of the log E is facing downward onto the emberbed and the S end of the log is pointing towards the front left corner of the ember bed.

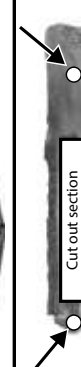

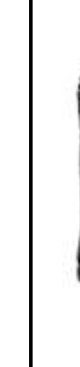

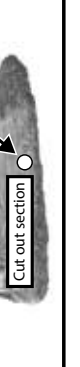

6. Oak or Driftwood log layout complete as shown below.

BIRCH LOG SET (PART #544-951) - INSTALLATION WITH GRATE

BEFORE YOU BEGIN LOG SET INSTALLATION:

1. Ensure you attach the round adhesive pads as indicated by the arrows in the table below.
2. The adhesive pads should be applied to the bottom of the logs to assist with assembly and proper positioning.

Log A (x1)		Log B (x1)		Log C (x1)		Log D (x1)		Log E (x1)		Log F (x1)	
Top View	Bottom View	Top View	Bottom View	Top View	Bottom View	Top View	Bottom View	Top View	Bottom View	Top View	Bottom View
											

Log set installation guide.

1. Position log A as shown.
Ensure that the cut out section on the bottom of the log A is facing downward onto the emberbed and the N end of the log is pointing towards the back corner right of the ember bed.

2. Position log B as shown, resting against log A. Ensure that the cut out section on the bottom of the log B is facing downward onto the emberbed and the N end of the log is pointing towards the back corner left of the ember bed.

3. Position log C as shown. Ensure that the flat face on the bottom of the log C is facing downward onto the emberbed and the S end of the log is pointing towards the front center of the ember bed.

4. Position log D as shown, resting against log A. Ensure that the cut out section on the bottom of the log D is facing downward onto the emberbed and the S end of the log is pointing towards the front right corner of the ember bed.

5. Position log E as shown, resting against log B. Ensure that the cut out section on the bottom of the log E is facing downward onto the emberbed and the S end of the log is pointing towards the front left corner of the ember bed.

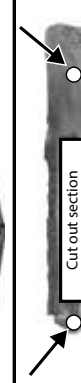

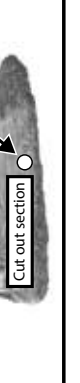

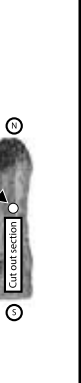

6. Oak or Driftwood log layout complete as shown below.

BIRCH LOG SET (PART #544-951) - INSTALLATION WITHOUT GRATE

BEFORE YOU BEGIN LOG SET INSTALLATION:

1. Ensure you attach the round adhesive pads as indicated by the arrows in the table below.
2. The adhesive pads should be applied to the bottom of the logs to assist with assembly and proper positioning.

Log A (x1)		Log B (x1)		Log C (x1)		Log D (x1)		Log E (x1)		Log F (x1)	
Top View	Bottom View	Top View	Bottom View	Top View	Bottom View	Top View	Bottom View	Top View	Bottom View	Top View	Bottom View
											

Log set installation guide.

1. Position log A as shown.
Ensure that the cut out section on the bottom of the log A is facing downward onto the emberbed and the N end of the log is pointing towards the back corner right of the ember bed.

2. Position log B as shown, resting against log A. Ensure that the cut out section on the bottom of the log B is facing downward onto the emberbed and the N end of the log is pointing towards the back corner left of the ember bed.

3. Position log C as shown. Ensure that the flat face on the bottom of the log C is facing downward onto the emberbed and the S end of the log is pointing towards the front center of the ember bed.

4. Position log D as shown, resting against log A. Ensure that the cut out section on the bottom of the log D is facing downward onto the emberbed and the S end of the log is pointing towards the front right corner of the ember bed.

5. Position log E as shown, resting against log B. Ensure that the cut out section on the bottom of the log E is facing downward onto the emberbed and the S end of the log is pointing towards the front left corner of the ember bed.

6. Oak or Driftwood log layout complete as shown below.

TROUBLESHOOTING

Problem	Possible Cause	Corrective Action
LCD Fireplace will not turn on.	LCD Fireplace is not plugged into an electrical outlet. Hardwire connections are not correct. LCD Fireplace has overheated and the safety thermal switch has been tripped. Main Board issue House circuit breaker has tripped.	Check plug. Plug in the LCD fireplace if necessary. See "Hardwiring Installation" Section. Unplug power or turn off the circuit breaker. Allow LCD fireplace to cool for 15 minutes and then plug it back in. Inspect the circuit board and replace, if necessary. Reset house circuit breaker.
LCD Fireplace turns off and will not turn on.	LCD Fireplace's fuse has blown. LCD Fireplace has overheated and safety thermal switch has tripped.	Check fuse for continuity. If fuse is blown, the electrical circuit board will need to be replaced. The fuse is soldered onto the circuit board & cannot be replaced and has a current rating of 3.15A. Unplug power or turn off the circuit breaker. Allow LCD fireplace to cool for 15 minutes and plug it back in.
LCD Fireplace has returned to default settings.	Power failure	Re-program the LCD Fireplace.
Remote control does not work.	Low/dead batteries Remote receiver malfunction Blank Screen	Replace the batteries in the remote control. Ensure remote receiver is not obstructed or interfered with. Replace the receiver sensor, if necessary. Check to ensure batteries are installed correctly & are polarity correct.
No warm air coming out of the LCD Fireplace	Heater setting is not selected. Heater has been locked out. Room temperature is higher than LCD Fireplace setting. LCD Fireplace has overheated and safety thermal switch has tripped. Hardwire connections are not correct. Heater issue Air Inlets dirty	See "Operation" section. See "Operation" section. Reset temperature setting. Unplug power or turn off the circuit breaker. Allow LCD fireplace to cool for 15 minutes. Ensure voltage/polarity is correct. See "Hardwiring Installation" Section. Inspect the blower and heater. Replace if necessary. Dust build up can inhibit efficient performance of the fan and lead to the safety switch cutting out. Keep the area around the appliance clean and free of fluff, dust or pet hair. Use a vacuum with a soft brush to clean the air inlet. See manual for details.
Heater shuts off automatically.	Room is too warm. Air Inlets dirty	The heater has a built-in thermostat. It will shut off automatically once the pre-set temperature has been reached. Dust build up can inhibit efficient performance of the fan and lead to the thermal safety switch cutting out. Keep the area around the appliance clean and free of fluff, dust or pet hair. Use a vacuum with a soft brush to clean the air inlet. See Resetting the thermal cutout switch in this manual for details. It will turn on automatically if the room temperature drops below the pre-set temperature.
Dim or no flame.	Flame brightness is not selected. Main Board issue. LCD screens or Media Board issue.	See "Operation" section. Inspect the circuit boards for loose connections or obvious damage. Replace the main board, if necessary. Reset the LCD Fireplace to default mode by long pressing the Reset button on the remote control. If the problem persists, contact your Regency dealer.

TROUBLESHOOTING (CONTINUED)

Problem	Possible Cause	Corrective Action
Ember bed is not glowing or dimming.	Ember brightness is not selected. Ember Light Strips issue Electrical Circuit Board issue	See "Operation" section. Inspect for loose connection of ember light strips. Reconnect the strips or replace them, if necessary. Voltage to ember strip should be 12 volts. Inspect the electrical circuit boards for loose connections or obvious damage. Replace the electrical circuitboard, if necessary.
House Circuit Breaker shuts off	Exceeding circuit rating	Additional appliances on the same circuit may exceed the current rating of the circuit. This heater requires a 12.5 amp circuit to operate.
LCD has lines up the screen	Power cord may not be installed corectly or screen may have been damaged if removed.	Replace LCD screen, if necessary.
Flame is Frozen/Does not Move	LCD or Circuit board Issue	Unplug & reconnect power /circuit breaker. Cycle ON/OFF If problem persitsits contact your Regency dealer.
The heater will not shut off when it reaches SET temperature on the hand held remote based on ROOM temperature.	*See below for details.	*None required as this is normal operation of the thermostat on this appliance.

IMPORTANT

*Heater Mode Operation

When the appliance heater is turned on, there will be two temperatures displayed. Both ROOM (top left hand corner of the remote screen) and SET (top right hand corner of the remote screen). Unlike typical thermostats/remote thermostats, the ROOM temperature on the remote will not change regardless of any temperature change that occurs in the room where the remote is located as the remote goes into sleep mode. The only way to see if the ROOM temperature has changed would be to press any button on the remote to wake up the remote. Importantly, the appliance's actual temperature control is managed by an internal sensor located beneath the ember bed. This sensor does not communicate with the remote, which is why the displayed ROOM temperature on the remote has no impact on how the appliance functions. Once the internal sensor detects that the set temperature (with a $\pm 2^\circ$ variance) has been reached, the heater will shut off. The blower fan will continue to run for an additional 30 seconds and then will also shut off.

SERVICE INSTRUCTIONS

IMPORTANT:

- Always shut off power prior to servicing this appliance.
- Label all wires prior to disconnection when servicing controls. Wiring errors can cause improper and dangerous operation.
- Ensure that the wires do not touch any hot surfaces and are away from sharp edges.
- It is recommended that the service be performed by a qualified professional.

Access to ember light strips, LCD screen and screen layer

1. Remove front glass.

2. Remove log set & ember bed.

Ember bed light strips connection

1. Replace ember light strips. Once Logs and ember bed have been removed the ember light tray will be exposed as shown below.

2. To remove the ember bed light strips, remove the logs and ember bed, start by gently squeezing and pulling each strip upward to

detach it from the black securing post. Once all seven ember strips have been removed, disconnect each Molex connector linking the strips together. Note that one of the Molex connectors is secured with a zip tie, which will need to be carefully cut to free the ember light wire harness.

After the zip tie is removed and all connections are detached, proceed with replacing the ember bed light strip. Once replaced, secure the new strips firmly onto the black securing posts and ensure they are stable.

Finally, reconnect all the Molex connectors and verify the stability of the entire assembly.

LCD screen glass layer access

1. Remove rear glass panel. Remove the unit from the cavity and remove the glass and media including the ember bed, logs and brick panels, remove the retainer bracket held in place with 4 x Philip head screws as shown below.

2. Once the retainer bracket has been removed the rear glass can be removed by tilting the glass forward and lifting outward.

NOTE: the LCD screen will also move with the rear glass care must be taken not to damage the LCD screen.

LCD screen connection & access

Steps for Removing the LCD Screen:

1. Open the top and back covers to expose the power board and multimedia video board.

2. Disconnect the screen's power cable from the power board (1) and the data cable from the video board (2).

3. Remove the protective strip from the top of the LCD screen's front glass. Caution: As you remove the front glass, the LCD screen must be supported with an appropriate object to prevent it from falling out of the fireplace chamber.
4. Carefully remove the LCD screen from the chamber.

Important: The LCD screen and its connections are fragile electrical components. Handle with extra care and gentleness to avoid damage.

Electric Circuit Board Access:

Remove the Access Panel:

1. Disconnect the power supply and carefully extract the unit from the cavity. Position the unit to facilitate access to the rear access panel, as illustrated below. Remove the six Phillips head screws, located as indicated, to access the main control board.

Detach the Control Board:

With the access panel removed, you may now proceed to detach the control board. To do so, press in on the four vertical black posts while simultaneously and carefully pulling each corner of the control board to disengage it. Once the board has been detached, observe, and document the positions of the Molex connectors for future reference. Proceed to disconnect each connector and then install the replacement control board.

Important:

Document Wire Connections:

Before disconnecting any wires, take note of the positions and configurations of all Molex connectors. Ensure each connector is clearly labeled or documented for proper reinstallation.

Disconnect the Connectors:

Proceed to disconnect each Molex connector one at a time. Ensure all wires follow the proper connection codes and are securely fastened. Inspect for any loose or damaged wires and address any issues before proceeding.

Install the Replacement Electric Circuit Board :

Position the new control board, ensuring it is aligned with the mounting posts. Carefully reconnect each Molex connector according to the documented positions, ensuring each connection is secure and follows the correct wiring codes. Double-check that all connections are tight and properly seated.

Final Checks:

Once installed, confirm that the board is properly secured in place and that no wires are pinched or misaligned. Verify all connections for stability and correctness before reassembling the unit.

Blower, heater, remote receiver, top LED lights Access:

1. Remove the unit from the cavity and disconnect from power, remove top outer firebox by removing 15 Philip head screws. 5 screws are located on the top of the appliance, 4 screws are located on the rear and 4 screws are located on each side.

Once all screws have been removed and the outer top shell has been removed, the top of the unit will be exposed as shown below. Access to the heater, blower, upper light and receiver are now accessible to swap out.

Operation Button Assembly replacement:

Diagram 1

Diagram 2

Diagram 3

To remove and replace the operation button assembly:

1. Remove the two Phillips head screws from the top, as shown in Diagram 1, and another two Phillips head screws as shown in Diagram 2.
2. This will release the retainer holding the receiver in place (refer to Diagram 3).
3. Disconnect the Molex connector from the rear of the receiver.
4. Replace the component and follow the steps in reverse to reinstall.

Top LED light, Heater and blower replacement

1. With the top of the unit exposed remove the fan mounting bracket by removing 4 Philip head screws on top and 2 Philip head screws on the left and right side as shown below.

Once the mounting bracket has been removed, remove 3 screws on each side of the heater unit (6 Total) doing so will allow access to the top light and the Molex connector.

Once the Ember light strip has been removed remove the physical strip from the mounting plate by loosening 2 x nylon Philip head screws as shown below.

To replace the blower or heater unit the above steps will need to be repeated, making sure to disconnect the wiring from the blower or heater unit.

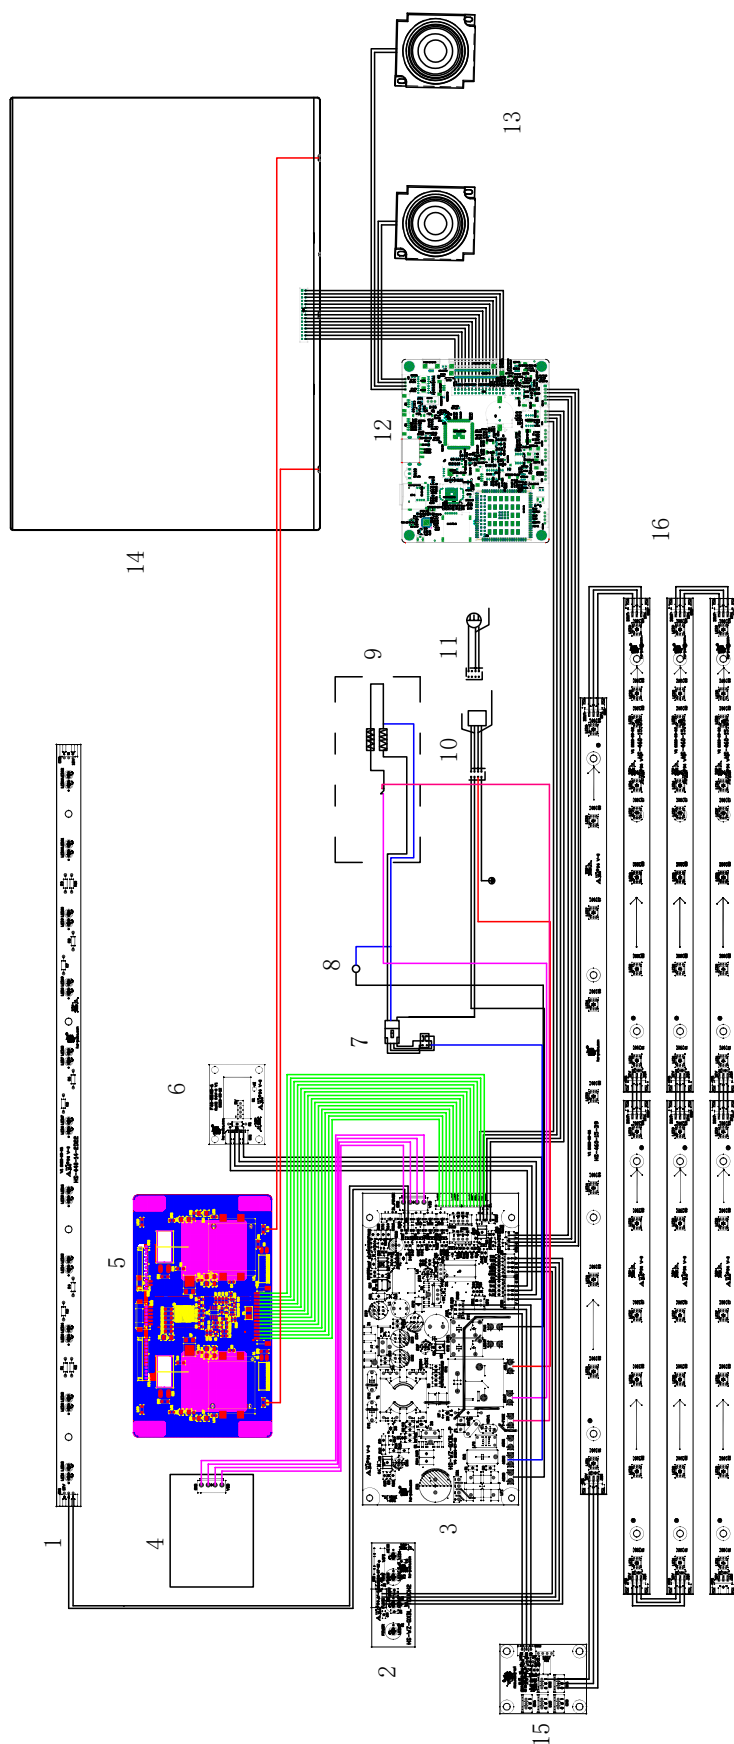

Blower or Heater Unit Replacement:

To replace the blower or heater unit, follow the steps outlined above, ensuring that all wiring is properly disconnected before removal.

Caution:

- Always ensure the power to the unit is completely disconnected before performing any maintenance to avoid the risk of electrical shock.
- Be mindful of wiring and connectors to prevent damage during removal and reinstallation.
- **Warning:** Improper handling or reconnection of wiring may result in malfunction or pose a fire hazard. Ensure all connections are secure and follow the proper wiring codes before powering the unit back on.

FPI Fireplace Products International Ltd., 6988 Venture Street, Delta, BC, V4G 1H4, Canada

LIMITED WARRANTY

FPI Fireplace Products International Ltd. (for Canadian customers) and Fireplace Products US, Inc. (for US customers) (collectively referred to herein as “FPI”) extends this Limited Warranty to the original purchaser of this Appliance provided the product remains in the original place of installation. The items covered by this Limited Warranty and the period of such coverage are set forth in the table below.

An Appliance in this policy is defined as an Electric Fireplace, Electric Insert.

This Appliance has only been certified and listed for use indoors.

Some conditions apply (see below).

This Limited Warranty starts on the day the Appliance was purchased.

The Limited Warranty is not transferable, amendable or negotiable under any circumstances.

Note: Warranty coverage noted above may not be applicable as components/options vary based on appliance purchased.

Conditions:

Warranty protects against defect in manufacture or FPI factory-assembled components only, unless herein specified otherwise.

***This warranty does not cover dealer travel costs, mileage, fuel, tolls for diagnostic or service work. All labor rates paid to authorized dealers are subsidized, pre-determined rates. Dealers may charge you for travel and additional time beyond their subsidy.**

Any part(s) found to be defective during the warranty period as outlined above will be repaired or replaced at FPI’s option through an accredited distributor, dealer or pre-approved and assigned agent provided that the defective part is returned to the distributor, dealer or agent for inspection if requested by FPI. Alternatively, FPI may, at its own discretion, fully discharge all of its obligations under warranty by refunding the verified purchase price of the product to the original purchaser. The

purchase price must be confirmed by the original Bill of Sale.

IMPORTANT: A 15 amp, 60Hz 120 Volt circuit is required for installation of this Appliance. A dedicated circuit is not required, but is highly recommended to prevent circuit breaker from tripping or fuse failure. Failure to provide adequate power to this Appliance will void your warranty.

NOTE: If hard wiring to the Appliance, this must be completed by a qualified electrician. Failure to do so will void your warranty.

The authorized selling dealer, or an alternative authorized FPI dealer if pre-approved by FPI, is responsible for all in-field diagnosis and service work related to all warranty claims. FPI is not responsible for results or costs of workmanship of unauthorized FPI dealers or agents in the negligence of their service work.

At all times, FPI reserves the right to inspect reported in the field/on location complaints of products claimed to be defective before processing or authorizing any claim. Failure to allow this upon request will void the warranty.

All warranty claims must be submitted by the dealer servicing the claim, including a copy of the Bill of Sale (proof of purchase by you). All claims must be complete and provide full details as requested by FPI to receive consideration for evaluation. **Incomplete claims may be rejected.**

Replacement Appliances to the original purchaser are limited to one per warranty term.

The Appliance must be installed according to all manufacturers' instructions as per the manual.

All Local and National required codes must be met.

The installer is responsible for ensuring the Appliance is operating as designed at the time of installation.

The original purchaser is responsible for the annual maintenance of the Appliance, as outlined in the owner's manual. As outlined below, the warranty may be voided due to problems caused by a lack of maintenance.

Purchased parts: Repair/replacement parts purchased by the consumer from FPI after the original coverage has expired on the Appliance will carry a **90-day** warranty from the purchase date, valid with a receipt only. Any item shown to be defective will be repaired or replaced at our discretion. No labor coverage is included with these parts.

If freight damage has been found either externally or internally, the dealer must be informed within 3 days. All claims as a result of damage must be submitted by the dealer servicing the claim, including a copy of the Bill of Sale (proof of purchase). All claims must be complete and provide full details as requested by FPI to receive consideration for evaluation. **Incomplete claims may be rejected.**

As this is a **1-year** Limited Warranty, if the Appliance needs to be replaced, the Appliance that was purchased at the time of sale might not be replaced with exactly the same model Appliance. In that case, FPI will replace your Appliance with one that is similar at the time of replacement under the terms of this Limited Lifetime Warranty, but **ONLY** in the event that an item covered by the Limited Lifetime Warranty is found to be defective. Please refer to the table on first page of this warranty for items covered by the Limited Lifetime Warranty. Product changes might be the result of the original Appliance being discontinued, changes in regulatory requirements, product advancements, etc., which are beyond the control of FPI. **This Limited Lifetime Warranty does not cover any installation costs, or costs associated with changes of required clearances for the replacement Appliance, hearth pads, mantles, facing and/or facing materials such as framing, completed walls made of drywall, wood, non-combustible board, tile, brick, stone, marble etc., venting/chimney systems, or components of the chimney system.**

If a suitable replacement is not available, FPI will refund **50%** of the purchase price of the Appliance and any applicable FPI accessories (faceplates, brick panels, media, etc.) purchased at the time of sale. **In no event will FPI refund any portion of the purchase price of, or reimburse costs associated with, any other items, including without limitation, installation of a new unit, changes of required clearances for a new unit, hearth pads, mantles, facing and/or facing materials such as framing, completed walls made of drywall, wood, non-combustible board, tile, brick, stone, marble etc., venting/chimney systems, or components of the chimney system. A copy of the receipt or bill of sale will be necessary to validate the purchase price.**

Exclusions:

This Limited Warranty does not extend to paint, rust or corrosion of any kind due to a lack of maintenance, combustion air provision, corrosive chemicals (i.e. chlorine, salt, air, etc.), batteries.

Malfunction, damage or performance-based issues as a result of environmental conditions, location, chemical damages, installation error, an installation by an unqualified installer, operator error, abuse, misuse, lack of regular maintenance and upkeep, acts of God, weather related problems from hurricanes, tornados, earthquakes, floods, lightning strikes/bolts or acts of terrorism or war, which result in malfunction of the Appliance are not covered under the terms of this Limited Warranty.

FPI has no obligation to enhance or modify any Appliance once manufactured (i.e. as products evolve, field modifications or upgrades will not be performed on existing Appliances).

Any Appliance showing signs of neglect or misuse will not be covered under the terms of this warranty policy and may void this warranty, including Appliances with rusted or corroded fireboxes that have not been reported as rusted or corroded within **three (3)** months of purchase.

Appliances which show evidence of being operated while damaged, or with problems known to the purchaser and causing further damages will void this warranty.

Appliances where the serial no. has been altered, deleted, removed or made illegible will void this warranty.

Minor movement, expansion and contraction of the steel is normal and is not covered under the terms of this warranty.

Freight damages for products or parts are not covered under the terms of this warranty.

Products made or provided by other manufacturers and used in conjunction with the FPI Appliance without prior authorization from FPI may void this warranty.

Limitations of Liability:

The original purchaser's exclusive remedy under this warranty, and FPI's sole obligation under this Limited Warranty, express or implied, in contract or in tort, shall be limited to replacement, repair, or refund, as outlined above. IN NO EVENT WILL FPI BE LIABLE UNDER THIS WARRANTY FOR ANY INCIDENTAL OR CONSEQUENTIAL COMMERCIAL DAMAGES OR DAMAGES TO PROPERTY. TO THE EXTENT PERMITTED BY APPLICABLE LAW, FPI MAKES NO EXPRESS WARRANTIES OTHER THAN THE WARRANTY SPECIFIED HEREIN. THE DURATION OF ANY IMPLIED WARRANTY IS LIMITED TO DURATION OF THE EXPRESSED WARRANTY SPECIFIED ABOVE. IF IMPLIED WARRANTIES CANNOT BE DISCLAIMED, THEN SUCH WARRANTIES ARE LIMITED IN DURATION TO THE DURATION OF THIS WARRANTY.

Some US states do not allow limitations on how long an implied warranty lasts, or allow exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

Customers located outside the US should consult their local, provincial or national legal codes for additional terms which may apply to this warranty.

How to Obtain Warranty Service:

Customers should contact the authorized selling dealer to obtain warranty service. In the event the authorized selling dealer is unable to provide warranty service, please contact FPI by mail at the address listed below. Please include a brief description of the problem and your address, email and telephone contact information. A representative will contact you to make arrangements for an inspection and/or warranty service.

RECYCLING

PRODUCT LIFE CYCLE:

By recycling your used appliances, you divert waste from your local landfills and help the environment. You also reduce the need for raw materials to manufacture new products. Contact your local municipality for appliance recycling services, local recycling programs, or appliance removal services to ensure your Regency appliance components, and packaging are properly recycled.
