## One world together book

**One world books. Together one world. Both worlds rentals gibraltar. Both worlds gibraltar rent.**

I want someone to talk to but who will I choose? Let's go on an adventure around the world to meet kids from different places and learn about their lives. In this lovely story, a small child visits nine countries - Brazil, China, Russia, Kenya, the Netherlands, Sweden, Japan, Morocco, and the United States - and makes friends with all the children he meets. Along the way, he discovers how kids live in other countries and enjoys doing things they like, as well as finding out what's the same and different about their lives. The book has wonderful illustrations and funny text that are perfect for young children. It teaches us that even though we're from different places, we can all be friends. The author read the picture book "One World Together" by Catherine Anholt, which celebrates diversity and friendships around the world. The story follows a young boy who wants to make friends with children from different countries and cultures. Each page features a fact or tidbit about a particular country, making it an educational and engaging read. The illustrations are realistic and immersive, allowing readers to feel like they're right there with the characters. The author highly recommends this book for children aged 5 and up, as it teaches important lessons about acceptance, appreciation, and understanding of different cultures. The language is simple and accessible, making it perfect for young learners. Additionally, the book introduces basic phrases in various languages, helping children learn about cultural nuances. The author's own child enjoyed the book, and they would definitely use it when teaching young kids about diversity and international culture. Overall, "One World Together" is an excellent choice for parents and educators looking to promote global understanding and friendship among their little ones. When you want to connect with someone new, it's nice to ask where they're from, what they enjoy doing, or share your own interests. I appreciated that this book took readers on a journey to visit some countries not typically featured in books like Brazil, Morocco, Kenya, the Netherlands, and Sweden. The beautiful watercolor illustrations showcase joyful children going about their daily lives, and the final fold-out page reminds us that we don't have to choose just one friend when there are many wonderful people from around the world. This book is great for teaching young readers about community, celebrating our shared humanity, and acknowledging our differences.
