

## Simple, Predictable Student Telehealth for California Districts — With No Billing Burden

Hazel allows your district to expand student access to Hazel’s online medical and mental health programs without becoming a healthcare billing organization. For a single fee, districts get comprehensive services, predictable costs, and no administrative burden—while Hazel manages clinical delivery and CYBHI billing behind the scenes.

### Why Choose Hazel’s Model

#### Launch Quickly

Hazel is already credentialed as a **CYBHI affiliate provider**, allowing districts to go live in weeks — not the **6–12 months** required to build internal staffing and billing infrastructure.

#### Zero Administrative Burden

Hazel manages:

- Hiring, training, and supervising licensed clinicians
- Provider credentialing and NPIs
- CYBHI claims, denials, and audits
- Compliance and payer requirements

*Districts avoid billing systems, Carelon coordination, and compliance exposure.*

#### Predictable, Sustainable Costs

A fixed annual fee means:

- No utilization-based cost swings
- No reimbursement timing risk
- Easier budgeting and multi-year planning

#### Expanded Access Despite Workforce Shortages

Hazel increases capacity beyond district-only models:

- Faster appointment availability
- Consistent coverage across the school year
- Support for early intervention and ongoing care

#### No-Cost Care for Every Student

- No copays, deductibles, or family billing
- Care available regardless of insurance status
- Supports equity and universal access goals

*CYBHI reimburses eligible services for insured students. Hazel covers care for uninsured students as part of its universal access model.*

### How This Compares to Self-Billing CYBHI

Hazel Partnership	District Self-Billing
Fixed annual cost	Variable staffing + billing costs
No hiring required	Recruit & retain clinicians
No billing or audits	Full CYBHI compliance burden
Immediate launch	6–12 month readiness process
Universal student access	Limited by staff capacity
