VIC.AI

INTRODUCING

VicAnalytics™ 2.0

Built for CFOs, controllers and AP leaders. Every AP number your finance team relies on, defined once and explained in plain language.

VicAnalytics 2.0 Standard Dashboard: The standard dashboard is organized around the questions finance leaders ask, starting with how efficiently AP is operating.

WHY FINANCE LEADERS CHOOSE IT

Trust every number

Every metric follows one shared definition, so leadership reviews and AP teams work from the same numbers.

HOW

Vic.ai business rules, built into the platform

See what matters

Each dashboard shows only the modules you use, with an Executive Summary that explains performance in plain language.

HOW

One standard dashboard that adapts to you

Integrate your raw data

Pull your raw AP data into Power BI, Tableau or your data warehouse, for your own reporting, audits or records.

HOW

The Vic.ai API, enabled by your Vic.ai team

VIC.AI

Built for the finance office

CFOs

An Executive Summary that defines and explains performance on key AP metrics in plain language.

THE VALUE

A clear read on AP performance for every leadership review.

Controllers

Business rules applied the same way everywhere, plus API access to bring the data into Power BI, Tableau or your warehouse.

THE VALUE

Consistent numbers, ready for your own reporting.

AP Directors and managers

Views of backlog, approvals, transmission errors, payments and spend, with measures like P90 explained.

THE VALUE

Know where work is stuck and what to clear first.

What's new in 2.0

One dashboard, tailored to you

The same metrics for every customer, showing only the modules you use, like VicPay or PO Matching.

Custom reports

Deeper analysis built for your organization, alongside your dashboard without changing it.

Richer visualizations

Heatmaps, funnels, flows and distributions, all in one consistent look.

Fast, focused dashboards

Data is summarized before it loads, and each tab runs only when you open it.

UNDER THE HOOD

Controls built into the platform

- ✓ **Consistent rules** — Every metric calculated the same way, everywhere.
- ✓ **Your data only** — Each firm's views are built only from its own data.
- ✓ **Complete totals** — Totals stay complete, even across thousands of vendors.
- ✓ **Safe updates** — Changes are validated, versioned and reversible.
