Luxurious warmth and lasting style.

Designed for Generations, Crafted for Architects

For over four decades, Yunca has set the benchmark for fireplaces in New Zealand, combining robust craftsmanship with timeless design. Our fireplaces are more than just heat sources, they are enduring centrepieces, designed to enhance the character of any space while delivering unparalleled warmth and efficiency.

Fire with Form and Function

Architects understand that great design is as much about performance as it is about aesthetics. Yunca's fireplaces are engineered with both in mind; crafted to complement modern, classic, and rural homes while meeting the highest standards of efficiency and sustainability. Built with quality materials and meticulous attention to detail, every Yunca fireplace is made to last for generations, ensuring longevity without compromising on style.

A Legacy of Craftsmanship

Yunca fireplaces reflect the strength, resilience, and beauty of our landscape. Our heritage is deeply rooted in producing heating solutions that stand the test of time, both structurally and stylistically. Whether specified for residential homes, architectural builds, or rural retreats, Yunca's range offers a seamless blend of elegance and practicality.

Architectural Simplicity and Choice

Understanding the needs of architects, we offer a refined selection of fireplaces designed to integrate effortlessly into diverse design environments. With clean lines, classic finishes, and a range of installation options, Yunca fireplaces provide both versatility and aesthetic harmony. Our collection includes freestanding and inbuilt options, each thoughtfully crafted to suit various spaces and styles.

Sustainable, Efficient, and Built to Last

Sustainability is at the core of our craftsmanship. Yunca fireplaces are designed to exceed New Zealand's stringent clean air standards while maximising heat efficiency and minimising emissions. With advanced combustion technology and superior heat retention, our fireplaces provide sustainable warmth without sacrificing performance or beauty.

A Collection for Every Space

On the following pages, you'll find a curated selection of our fireplaces, each accompanied by key specifications to assist in your design process. Whether you seek a statement piece or a subtle, functional addition, Yunca offers fireplaces that align with architectural intent - classic, enduring, and made for life.

Sustainability

We believe sustainability starts with quality and by purchasing a Yunca you are likely to have generations being warmed by this very wood burner.

Our Plant a Tree Promise

We don't just ensure a quality, recyclable product we are also doing what we can to support air quality and our environment.

For every Yunca heater sold, we purchase a seedling to be planted by a sustainable firewood producer based in New Zealand.

Carbon Neutral Home Heating

Yunca Wood Burners offer a low-carbon, sustainable alternative to heating your home.

Burning firewood releases no more greenhouse gases than would be produced by leaving wood to rot on the forest floor.

If you source your wood locally from a sustainable firewood producer, using your efficient Yunca heater is almost carbon neutral.

Breathing New Life

Your Yunca Heater has a long life expectancy. We take pride in manufacturing every element ourselves because we value quality and know that product longevity is critical for any sustainable business.

When the time does come to say goodbye, your heater is not destined for landfill*. Almost every part can be recycled, upcycled or given a second lease of life as a reconditioned used heater.

**Your retailer can assist you to recycle your Yunca heater.*

Olli

Beautifully designed, Olli's panoramic glass catches each and every flame flicker for the ambience only a wood burner can truly provide.

With the latest technology, the Olli uses its heat exchanger and fan to efficiently spread heat throughout your home.

The Olli will heat homes up to 250m² with ease and is recommended to be used alongside a heat transfer kit for a complete home heating solution.

The external intake directly feeds fresh air into the firebox to ensure the Olli burns beautifully even in airtight, well insulated homes.

The drop-down door with wide panoramic glass delivers a spectacular modern feature in your home.

Olli is particularly popular in new home builds with large open plan living spaces.

Homes in cooler climates with large rooms or poor insulation will appreciate the heat that Olli provides.

Tommi

The Tommi has the highest heat output of the Yunca range for heating homes of up to 300m².

Beautifully designed, Tommi's panoramic glass catches each and every flame flicker for the ambience only a wood burner can truly provide. The drop-down door and large firebox design accommodates larger logs, giving longer burn times. Coupled with an excellent clean air rating, Tommi doubtlessly delivers.

With the latest in wood burning technology, the Tommi uses its heat exchanger and fan to ensure heat is spread throughout your home in the fastest way possible.

The Tommi will heat homes up to 300m² with ease and can be considered a total home heating solution.

The external intake directly feeds fresh air into the firebox to ensure the Tommi burns beautifully even in airtight, well insulated homes.

Its thermostatically controlled fan ensures faster and more efficient heating. If you want to make a real statement in your home or commercial space, Tommi certainly is it!

Tommi Inbuilt

Introducing the Tommi Inbuilt, the latest addition to the Yunca Premium Range.

Whether you're looking to make a statement in your home or commercial space, the Tommi Inbuilt is perfect in any room.

The panoramic glass showcases every flame flicker, creating an ambience only a wood burner can truly provide. Its drop-down door and large firebox design accommodate larger logs, ensuring longer burn times. With an excellent clean air rating, it delivers exceptional performance.

The Tommi Inbuilt uses a heat exchanger and fan to distribute heat throughout your home quickly and effectively. This advanced system makes it a comprehensive home heating solution, effortlessly warming spaces up to 300m².

The external intake feeds fresh air directly into the firebox, ensuring efficient burning even in airtight, well-insulated homes. Its thermostatically controlled fan ensures faster and more efficient heating.

Wegj

The Wegj Wood Burner has a conscience. It's environmentally-friendly for both inside and outside your home.

Wegj's economical running costs, large heat output and excellent clean air rating ensures it meets your family needs, as well as those of the environment.

The large window allows more radiant heat to circulate the room while enhancing the look and ambience of the fire. With its wider pull down door, Wegj fits larger logs with ease and its timeless design ensures it will always look stylish in your home.

Yunca's Wegj unit is ideal for homes in cooler climates and large rooms, effectively and consistently heating the space.

Wegj is also a favourite for its commercial application, a popular heating and ambience option for boutique hotels, cafes and restaurants.

Oscar

The Oscar Wood Burner's compact size is no reflection of the highly efficient amount of heat it produces.

Oscar's natural good looks and less intrusive footprint make this unit an attractive home feature. It can be used as both a primary and secondary heating source depending on climate, room size and insulation.

The Oscar model is available in CA 1.1 and Sub 0.5 units. CA 1.1 is suited to areas requiring emissions lower than 1.5g/kg. This unit has been optimised for the best performance and includes a damper for greater output control.

Sub 0.5 takes the guess work out of getting the best performance from your fire. Top up the wood as needed, and the heater takes care of keeping the emissions as low as possible. It's pre-set at the factory for optimum performance, so there are no user-controlled air intakes to worry about.

Ruby

The Ruby brings warmth and functionality to your home. Its Ultra Low Emission Burner technology delivers not just heat, but an even cleaner, more environmentally friendly burn.

A wide firebox and large door make it easy to load and burn larger logs, reducing refuelling. The cooktop surface is perfect for heating pots or boiling water, ideal for everyday use or emergencies.

With an impressive output the Ruby efficiently heats spaces up to 180m². It's well-suited for family homes, open-plan living, baches, and rural properties, anywhere that needs serious heat with modern flair.

Its clean design suits a range of interiors, while the large glass window offers a captivating view of the flames.

Xander

If you're wanting a stylish insert fire for a new timber wall construction or to retrofit into an existing masonry installation, our Xander models could be the perfect option for you.

The Xander is suitable for Masonry installations or as a Built-in "ZC" unit when paired with a ZC panel set, as well as the "Zero Clearance Kit".

Xander has one of the largest heat outputs of the Yunca wood burner range, and an excellent clean air rating. This means both your family's and the environment's needs are met. The large window allows more radiant heat to circulate the room while adding to the ambience of the space.

Its wider pull-down door fits larger logs with ease. Its stylish aesthetic suits both new and existing homes.

Xander pairs particularly well with new timber wall constructions, but can be used in multiple applications. Its inbuilt thermostatically controlled fan ensures fast effective heating. This unit provides excellent primary or secondary heating depending on room size, insulation and climate.

Monte Base

Monte

The Monte Wood Burner has a fresh, modern design combined with a convenient cooktop. The Monte range is available in three different mounting styles to suit any space.

Monte incorporates a stylish, modern fireplace with a cooktop to add functionality to any home. The large glass window provides a mesmerising view of the flames, enhancing the warmth and ambience of any living space. The large door allows for ease of refuelling wood.

It can be used as both a primary and secondary heating source depending on climate, room size and insulation. The practical cooktop is a handy feature, keeping dinners warm on cold winter nights by using the heat already produced by the fireplace.

Monte Hybrid Multi-Fuel

Monte Euro Multi-Fuel

Monte Hybrid

The Monte Hybrid Multi-Fuel is a stylish modern fire incorporating a cooktop, which adds functionality to any home. It is available in two styles – Monte Hybrid and Monte Euro.

Monte heats your home all day and well into the night, firing up easily to take the chill off frosty winter mornings. It is a great option for long lasting heat and for the flexible use of a variety of fuels, for cost efficiency or availability.

It can be used as both a primary and secondary heating source depending on climate, room size and insulation.

Blenz Hybrid

Blenz quickly and effectively heats the largest of rooms using either wood, coal, lignite or a combination of all three with long lasting heat.

Its enamel finish and large glass door provides a welcome setting and ambience in any room. The top grill is removable and can be used as a warmer to heat food and liquids.

It can use a variety of fuels, for cost efficiency or availability. Blenz is a perfect fit for indoor spaces where constant heat is a necessity.

Blenz heats your home all day long and well into the night, firing up easily to take the chill off frosty winter mornings.
