

Financial infrastructure partner for PE-backed software and MSP businesses.

Who are Finomatic?

We build and optimise financial and operational reporting, forecasting, and data-cube foundations that support PE-backed software and MSP companies from investment through to exit - delivering real-time, decision-ready insight without the disruption of implementing new software.

How we help our clients

We take messy data and build clean, automated dashboards and forecasts that:

- ◆ Show what's really driving growth
- ◆ Improve internal decision-making
- ◆ Reduce manual processes so the team can focus on scaling

Investors we've supported:

"Finomatic delivered significant strategic value. We realised an immediate 4.2x ROI in identified cost savings, and the improvements to our reporting and forecasting have accelerated decision-making."

Paul Davis,
Founder & Co-CEO, Nimbus

34 Clarges Street, London, W1J 7EJ
