

Axis Leveling Saddles

Description

AXIS Measurement leveling saddles are a cost effective solution for providing a mounting location for vertical 2" pipe risers on horizontal meter runs. Since not all meter tubes are level, the leveling saddle also offer a system to level your 2" pipe risers.

With over 10,000 saddles in stock, we are the industry's favorite choice for mounting your equipment such as measurement tools, antenna arrays, and solar panels.

Features and Benefits

- Available for line sizes 2"-12"
- U-Bolt set up included with each saddle
- Large inventory for in stock deliveries
- Quality product with competitive pricing
