

Explorer Eclipse

Construction ERP Software

Feature Overview: Eclipse Analytic Scheduler

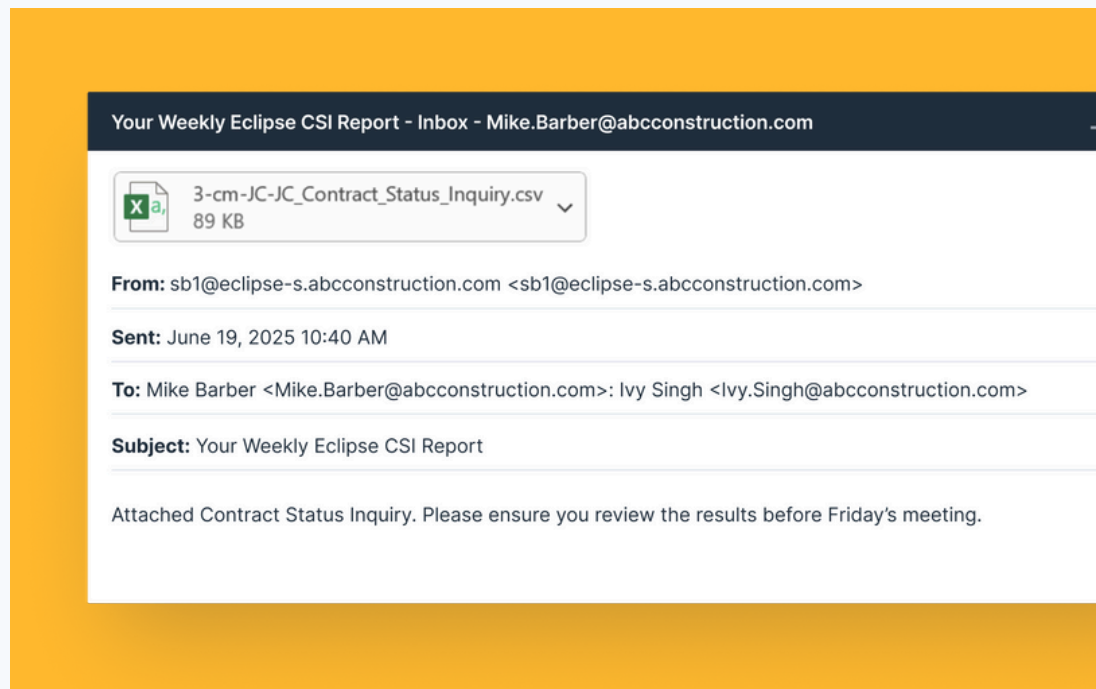

Automate Analytics Delivery.

Keep Projects and People Aligned, Without Lifting a Finger.

Overview

The Analytic Scheduler app allows you to automate the generation and distribution of selected Eclipse analytics on a recurring schedule.

Whether you need daily project updates, weekly financial snapshots, or monthly summaries, this powerful add-on ensures the right data reaches the right people, without the manual effort.

Why Add the Eclipse Analytic Scheduler?

Comprehensive Data Collection

Let Eclipse handle recurring analytics, so your team receives the insights they need, when they need them.

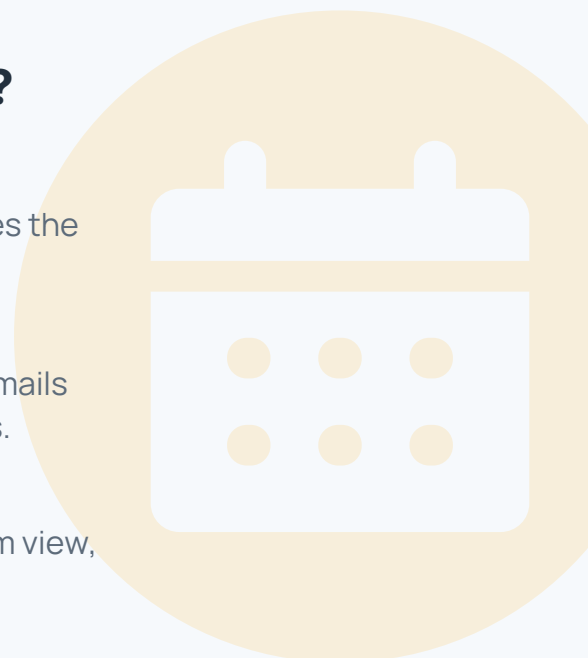

Reliable Delivery

Automatically send reports by email or upload using FTP. Emails can be configured with custom subject lines and messages.

Easily Customized to Your Needs

Select an analytic, filter the selected data, save as a custom view, then control when and how it gets delivered.

Key Features

- ✓ Choose any existing Eclipse analytic
- ✓ Filter using custom parameters
- ✓ Schedule hourly, daily, or monthly
- ✓ Deliver reports by email or FTP
- ✓ Export as CSV
- ✓ Customizable subject lines and message content
- ✓ Automated audit logging
- ✓ Ideal for recurring meetings, financial reviews, and operational updates

Ready to Automate Your Reports?

Contact your Explorer sales representative to learn more about adding the Analytic Scheduler to your Eclipse system.
