

DCRE

Recessed Edge Lit LED Exit Sign

The DCRE series provides a high quality specification grade edge-lit exit sign that is aesthetically appealing and designed for architectural excellence. Features include an aluminum ceiling trim with several stylish finish options and injection-molded wedge shape acrylic panels with 6" letters. The LED light source makes this exit sign energy efficient, with improved visibility and uniform letter illumination, and virtually no maintenance cost due to the projected long lamp life.

FEATURES

- Compact, low profile design
- Energy consumption of less than 3 watts
- Emergency battery backup model (EM) is completely self-contained
- Infield installable directional indicators
- Standard AC and emergency units available
- AC on indicator light and test switch (EM units only)
- Sealed lead battery on emergency (EM) units
- 120/277V operation
- For T-Bar grid ceilings only
