

# Acoustic Panel Installation Guide

## NOTE:

- 1 Read instructions carefully before installation.
- 2 Install by a qualified electrician.
- 3 Make sure the power is OFF before starting installation or attempting any maintenance.
- 4 Application space is with no chemical compositions such as sulphur, acid, halogen etc.

**STEP 1** Take the acoustic panel out of the package, with the bracket side facing up. Tilt it slightly and slide it into the back of the hexagon light fixture along the bracket direction.

**STEP 2** Adjust the panel position so that the bracket extends beyond the panel and rests on the back of the light fixture. The panel is now installed.
