Description

The DWP series is a high quality LED enclosed luminaire specifically designed for long-term, element prone installations. The DWP features 0-10V dimming standard and consists of an internal steel geartray enclosed in durable fiberglass, quality paint finishes and superior electrical components. This luminaire is an excellent choice for food processing areas, car washes, cool storage areas, beverage and bottling facilities, exterior retail, construction sites, gymnasiums and locations subject to the elements.

Features

- Vandal resistant options are available.
- Prior to painting, all metal parts are treated with a multi-stage phosphate bonding process to ensure adhesion and inhibit rusting.
- All steel components are painted with a lighting grade baked white enamel, having a reflectance factor exceeding 87% for premium quality and durability.
- Stainless steel latches and mounting brackets standard.
- Housing is molded of one-piece impact resistant fiberglass reinforced polyester; self extinguishing, flame resistant and unaffected by many industrial chemicals.
- Continuous poured gasket is permanently bonded to the upper housing, forming a continuous tight seal with the diffuser.
- Stainless steel latches clamp the diffuser tightly to the housing.
- Knockouts are provided on ends for convenient installation.
- 0-10V dimming standard
- Acrylic diffuser is 100% impact resistant for longevity.
- Lens features clear bottom surface for maximum light transmission.
- NSF Approved for Splash and Non-food Zones.

Interested in upgrading from HID to LED lighting? Use the conversion table below to get a general idea of what wattage LED fixture will replace your current lighting system. Lumen output and overall performance will vary by fixture, so please contact our factory or your nearest sales rep regarding specific questions on what wattage will best suit your desired space and application.

Step Dimming & Bi-Level

FSP-211

The FSP-211 mounts in an outdoor lighting fixture and provides multi-level control based on motion. The sensor also includes a photocell to measure the ambient light level. It controls 0-10 VDC LED drivers or dimming ballasts, as well as non-dimming ballasts and, with an FSP-Lx Lens, is rated for wet and cold locations. All control parameters are adjustable via a wireless configuration tool capable of storing and transmitting sensor profiles.

Key Features

- Fully adjustable high and low dimmed light levels.
- Designed for LED fixtures; rated for extreme temperatures and up to 200,000 on/off cycles.
- Hold off setpoint with automatic calibration option for convenience and added energy savings.
- Adjustable via handheld wireless configuration tool.
- IP66 rated with choice of lenses for wet and outdoor locations, and mounting heights from 8' to 40'.
- Adjustable time delay and cut off delay.
