

About

I'm a Graphic Designer who recently graduated from the Advertising and Graphic Design program at Humber. My passion for art runs deep, and it all started with music back in 2017. Moving from Istanbul, Turkey, to Toronto, Canada was a major step for me, and it opened the door to my interest in advertising and design. I love creating designs that are not just visually striking but also carry unique emotions. I believe every piece of design work has its own story and feeling, and I'm constantly driven by the excitement of discovering these new feelings through the art.
