

*You own your story. We only share it the way you want it told.*

### Your Rights

You choose which images (if any) we share.

We ask for **separate, explicit permission** for marketing use after each shoot.

No hidden waivers. No assumptions. Ever.

### Our Promise

**Privacy, dignity, and empowerment** come before any marketing need.

Change your mind? We'll remove your images from our materials — no questions asked.

### How It Works

Before each session, we'll talk through your comfort level and get clear, documented consent. After the session, we'll reiterate and check in with you. You stay in control at every stage.

# Consent Culture Statement

**Consent is not a checkbox. Consent is the art.**

Every image we create is built on trust, respect, and your full control.
