

Groupize Found the PCI Partner They Trust in SecurityMetrics

Never have a false
sense of security.™

Background

Groupize provides innovative, cloud-based solutions that reduce the complexity of sourcing, booking, and managing multi-room reservations, extended stays, groups, and meetings in real-time. In early 2018, CEO Charles de Gaspe Beaubien realized the importance of obtaining a PCI Attestation of Compliance because many of the prospects Groupize worked with said they would only work with companies that had one. Enter SecurityMetrics, which provided a qualified QSA to conduct a thorough PCI audit to uncover the gaps in Groupize's compliance efforts.

"We were impressed with every aspect of the experience. While audits are never fun, the experience was positive and educational for our entire organization. The QSA was clearly an expert in this field and conducted the entire engagement professionally. We're quite happy to be publicly associated with a leader in the security industry."

Charles De Gaspe Beaubien

President and CEO, Groupize

PCI Compliance Challenges

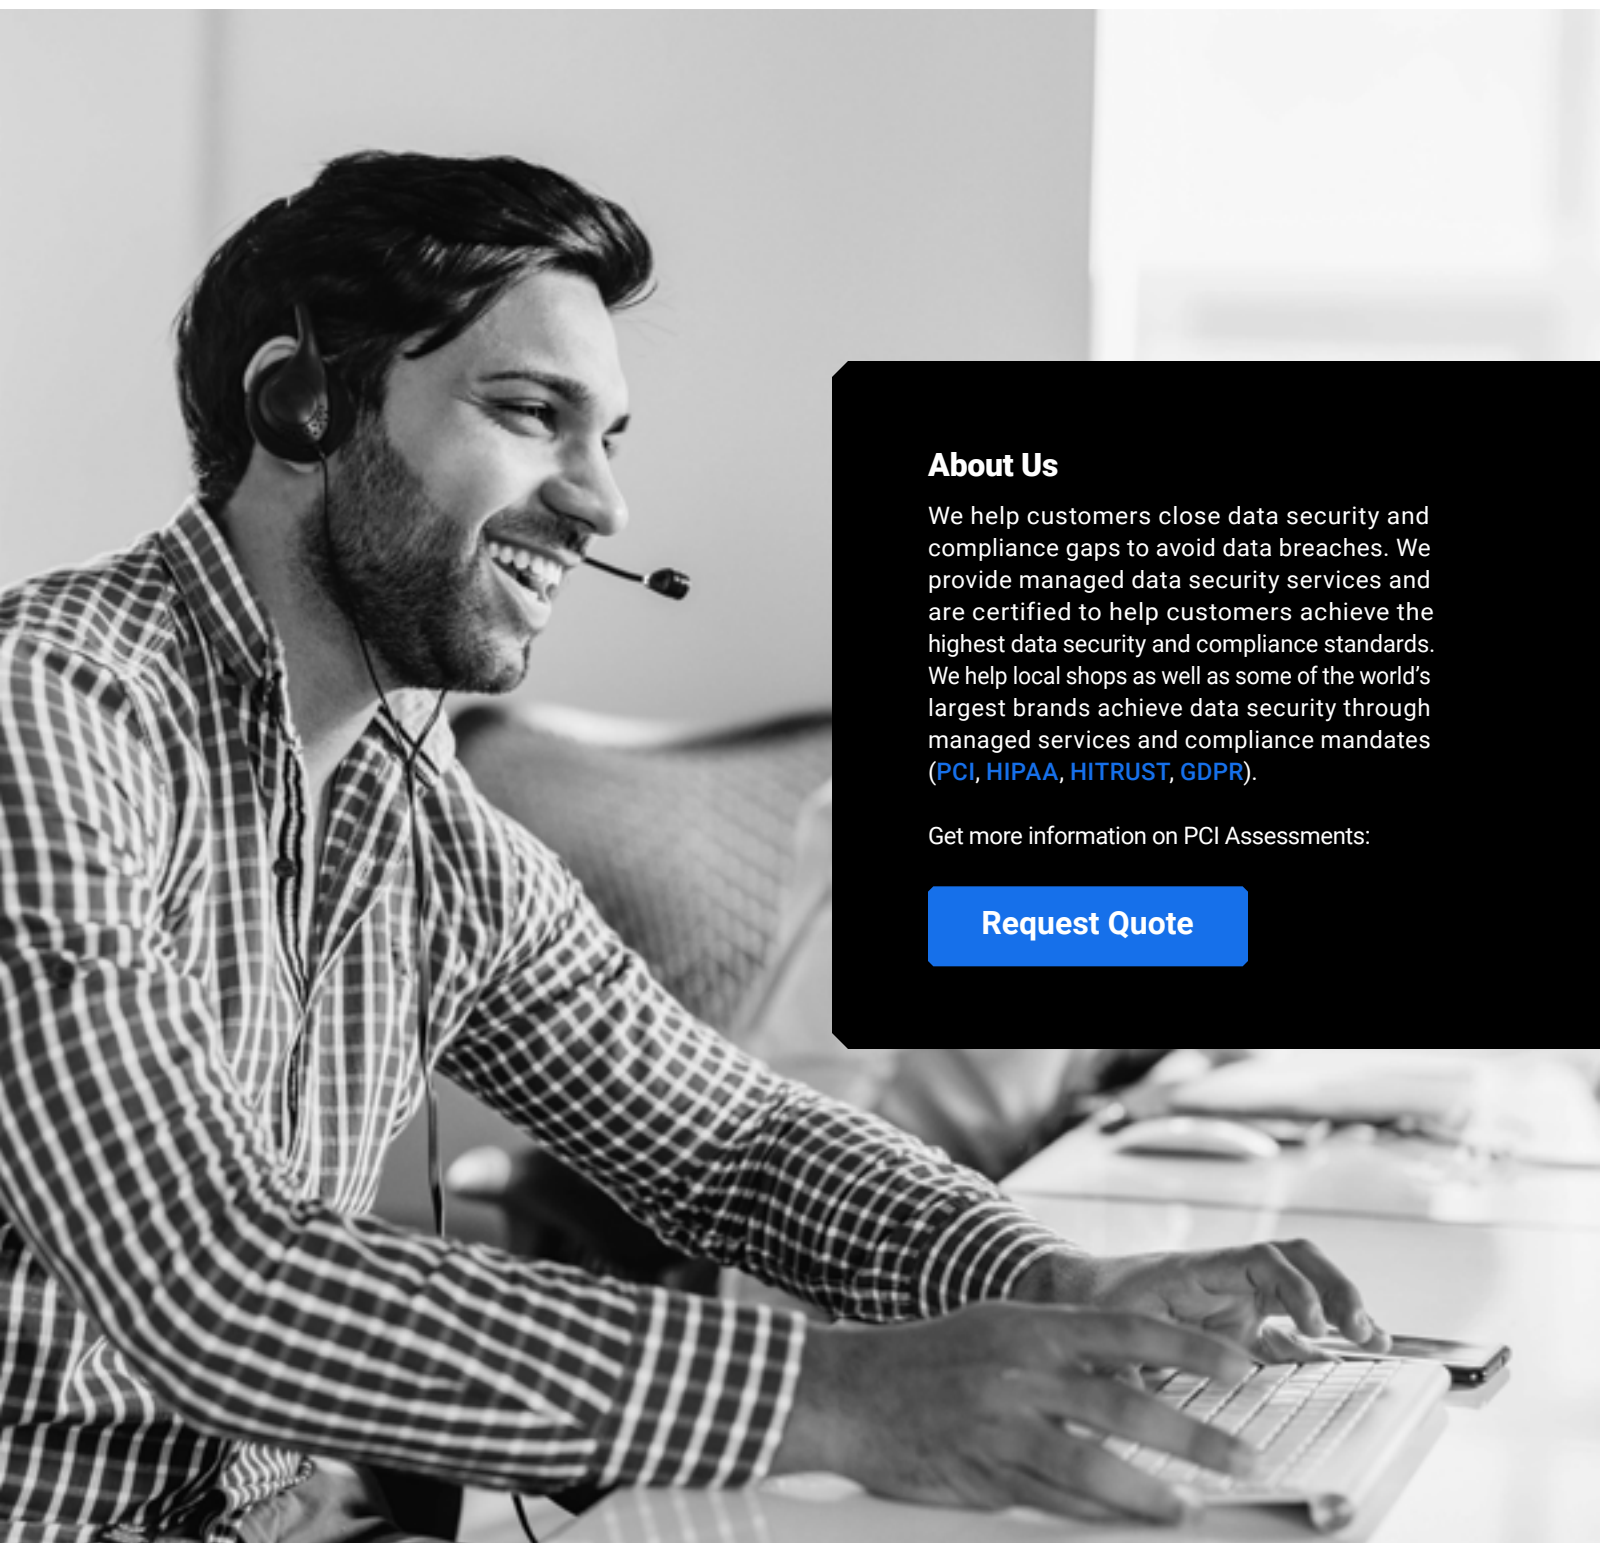

- We had clients requesting that we obtain a PCI Attestation of Compliance.
- Many prospects told us they would only work with companies that had an Attestation of Compliance.
- Having never gone through this process before, we didn't know where to start.

Resolving Challenges With SecurityMetrics

- SecurityMetrics provided us with a spreadsheet that outlined what information was expected of us. We were able to use this tool as a measuring stick to figure out what gaps we were likely to have. We knew that if our policy addressed everything on that list, we would be in good shape.
- Our QSA communicated clearly throughout the process and made sure that all aspects of the audit were consistent with set expectations.
- Our QSA was an expert on all topics during the audit. He was able to address topics at a high level with leadership as well as have code- and architecture-level discussions with our developers.

Goals Achieved Working With SecurityMetrics

- We obtained our PCI Attestation of Compliance.
- We are now able to work with prospects that require an Attestation, as well as appease current clients.
- We found an industry-leading partner that we know we can trust when we have PCI compliance problems or questions.

About Us

We help customers close data security and compliance gaps to avoid data breaches. We provide managed data security services and are certified to help customers achieve the highest data security and compliance standards. We help local shops as well as some of the world's largest brands achieve data security through managed services and compliance mandates ([PCI](#), [HIPAA](#), [HITRUST](#), [GDPR](#)).
