

Clean Slot

Clean Slot is a standout performer when processing high moisture materials, giving you consistent performance even in adverse conditions. Clean Slot is ideal for jobs requiring de-sanding and quick elimination of fines for asphalt chip production. It has proven successful in producing manufactured sand, slag, ag-lime and lightweight aggregates.

Attributes

- Self-cleaning screen
- Unique three-dimensional weave
- Slotted screen design with elongated openings
- Maximum open area
- Designed with alternating straight and crimped wires
- Crimped wires absorb energy and vibrate rapidly
- Consistent product and quality output
- Ideal when processing high moisture materials
