

Clean Thru Self-Cleaning Crimp Style

Clean Thru is a self-cleaning, exact sizing, crimp style screen. This product is a combination of straight wire and crimped wire in a square opening design.

This engineered technology provides excellent vibration differentiation, making it ideal when pegging is a problem; for example, in coal mining, virgin asphalt, cement, wash plants and mason sand uses.

Attributes

- Provides a consistent cut to keep your mix design in spec
- **Helps to meet and exceed DOT superpave specifications**
- **Reduces lost production time and increases bottom line profit**
- **Prevents plugging and pegging**
- **Effective use of screen surface area**
- **Available in a variety of sizes and alloys including Gator and stainless steel**
- **Clean Thru™ eliminates problems by effectively maximizing the use of available deck screen surface area**
