

Wear Protection Synthetic Wear Products

Protecting your investment is our top priority - accessories to our wear protection line include spray bar deflectors, channel rubber, horizontal cross bar protection, rubber coated tension rails and more.

Need recommendations? Call our team today and we'll send one of our field specialists to do an assessment to give you the best possible solution.

Heavy Duty Canoe Liners

- Easily adjustable cost effective skirting and side board technology
- Long lasting steel backed rubber with no effect on belts
- Available with or without ceramic
- Ideal for tunnels, feed areas and transfer points

Chute Liners

- Superior protection life to AR plate. 3:1 sliding, 5:1 impact
- 1" to 5" thick
- Available in bolt holes, studs or plug weld
- Custom molded to any chute
- Significant noise reduction

Ceramic Chute Liners

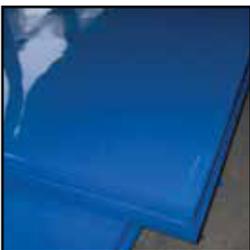

- Combine impact resistance of rubber with wear resistance of ceramics
- Highest quality ceramics on the market
- Molding to any shape. 1" to 3" thick, 12"x12" to 60"x120"

Haul Truck Liners

- Providing protection against impact tear, cut and abrasion
- Provides an almost maintenance free solution
- Improves driver comfort
- Reduces noise

Urethane Protection Sheets

- For extreme abrasion or wet conditions
- Available in a variety of sizes
- Available with bolt holes, plug welds and as plain sheets

Fine Ore Ceramic Liners

- Best wear protection in fine ore applications
- Superior acid resistance

Wear Protection Synthetic Wear Products

Get the most out of your equipment with Buffalo Wire Works' rubber and synthetic protection products. Our protection product line is designed to save you money through reduced costs and increased productivity.

Modular Standard Protection

- Our standardized panels come in 1'x1' for easy installation
- Design your own protection system
- Available for dry to wet, fine to coarse applications
- Engineered to maximize return on investment

Customized Protection

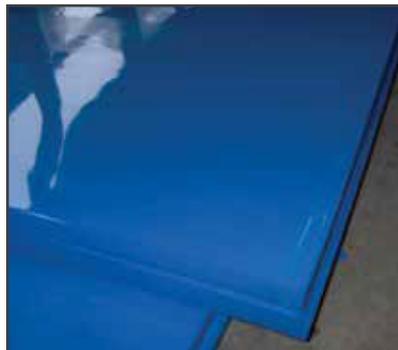

- Materials are designed to last in your application
- We work with your team and design to your specifications and needs
- Create individual pieces for high wear areas to lower the total systems cost per ton
