

Hooked Panel

Buffalo Wire hooked panel screens are manufactured to your exact OEM specifications to ensure the best fit, form and function.

We can manufacture replacement panels up to 14 feet in length for all types of high and low frequency machines.

Performance Features

All screens are manufactured with tight tolerances to produce proper tension and high performance and fold-backs to reduce fraying.

- Cotton webbing inserts on finer mesh protect cloth from metal hooks
- 1" laps prevent cross contamination between screen panels
- Protective tape inserts prevent center holes from fraying as well as added cushioning to center hold-down bars
- Double reinforced hooks in standard galvanized or stainless steel prevent wire cloth from slipping out of the hook
