

# PFX Self Cleaning Modular Panels

## Innovative Performance in a Rugged Package

These panels clean themselves. Buffalo Wire Works' new PFX Self Cleaning Modular Panels are the newest wave of technology designed to increase tonnage per hour. Even better? These panels are easy to install and fit into your existing system without any deck modifications – simply put into action and watch your production increase! Available in tensioned and untensioned models.

### Tensioned

Revolutionary Technology to Solve Age-Old Problems

- The unique high tensioning of the screening media insert prevents pocketing and performs as efficiently as a hooked screen
- Eliminates blinding and pegging
- Durable construction and long panel life
- Instantly increases open area and throughput over synthetic systems
- Ideal for finer aperture applications
- Install directly into your existing flat deck chassis system – no modification required
- Available in configurations to be installed in 8 pin Polydeck®-compatible system and Tema Isenmann WS 85®-compatible styles

### Untensioned

Unrivalled Strength and Performance

- Patented PFX/HT wire (Patent #8893894) is designed for maximum performance
- Handles heavier loads than traditional spherical wire
- Larger self-supporting apertures allow for more open area and higher throughput without sacrificing strength
- Unrivalled lifespan will outlast any competitor's like panel or screen
- Ideal for larger aperture applications
- Our standard 1' x 2' modular panel will install directly into your existing flat deck chassis system – no modification required

# Aggregate & Mining Products

Serving all of your quarry needs and more

Buffalo Wire manufactures complete standard and custom solutions for the Aggregate, Slag, Coal, Construction, Mining and Recycling industries.

Call our team today to learn more about our Aggregate and Mining products and what Buffalo Wire can do for you.

## Self-Cleaning PFX Screens

- Anti-pegging and anti-blinding
- Increased productivity and longevity
- Offered in stainless steel and gator wire
- Variety of different designs
- Superior lap and strip design

## Clean Deck - Urethane & Rubber

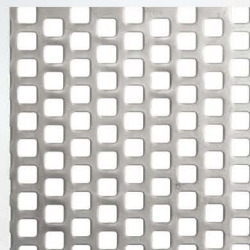

- Urethane and rubber products
- Modular screen panels fit Polydeck, Tema, Durex®, Metso® & other systems
- Other products include tension mats, classifier shoes, chute liners, sheet stock and more

## Wire Cloth Screens

- Available in gator, high carbon, stainless and other alloys
- Gator Wire - a superior, long-lasting, high tensile, high strength abrasion resistant wire
- Offered in space, mesh and slotted openings

## Hard Core - Punch Plate

- Available in all grades, including HARDOX™, AR200, AR400, AR500 and more
- Extreme abrasion resistance
- Wide range of patterns, apertures and thicknesses

## Slotted Screens

- Maximum open area reduces blinding and increases screening efficiency
- More effective screening of bulky, wet and sticky materials
- More efficient screening in blinding conditions

## Accessories

- Accessories include magnetic liners, training guides, tension rails, channel rubber, classifier shoes, and more
- Many items in stock for fast delivery
