

Taped Edge

Buffalo Wire premium taped edge panels are manufactured to your exact OEM specifications. We guarantee fit, form and function with standard food grade tape edging for common applications and high temperature tape for the most abrasive applications. Metal edging is also available as an option in abrasive applications.

Features

- Backing Screens for Extended Life
 - Innovative screen strength for longer wear life
 - Heavy load support for finer meshes
- Custom Screen Dimensions
 - Compatible with machines such as Great Western[®], Rotex[®] and Andritz[®]
- Tape for Every Application
 - Standard white food grade tape is ideal for applications up to 180 ° F
 - Black hi-temp tape is available for abrasive applications up to 600 ° F
 - Metal edging is available for heavier screens
- Tight Tolerances Ensure Even Tension
 - Poor tension can cause premature failure and decreased efficiency, Buffalo Wire Works screens offer even tension all around the screen so the width and length dimensions are consistently even.
- Urethane Edging on All Ball Tray Screens
 - 3/4" urethane edging on all sides
 - Prevents wire breakage and sharp edges
 - Embedded staples can't dislodge to contaminate product
