

The Power of Three

Leverage proven expertise to optimize and simplify your cloud journey

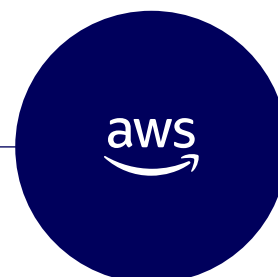

Delivering swift and risk-mitigated cloud migrations for even the most complex healthcare companies, Atos, Healthcare IT Leaders, powered by Amazon Web Services (AWS), will expertly guide enterprises through change – transforming mission-critical legacy environments into powerful platforms for innovation and sustainable future growth.

Healthcare IT Leaders' deep industry knowledge empowers you to make informed, data-driven decisions for better patient outcomes.

Our expertise in IT management ensures seamless operations, enabling you to focus on patient care.

Built on AWS cloud infrastructure for secure, scalable, and cost-effective solutions.

Our Joint Offerings

Data Center Transformation to Cloud

Healthcare IT Leaders supported the first zero-on-premise epic footprint and integrated 3rd party ecosystem application implementation, built on AWS. Now fueled by Atos' CloudCatalyst program, we collectively bring funding, experience, talent, and accelerators no one else has.

Cloud Acceleration

Our cloud acceleration program helps reduce the time to value and includes a range of hybrid cloud solutions. Our approach is built around cost savings to healthcare providers. We offer a healthcare-centric, risk-mitigated journey to cloud unmatched in the industry, powered by AWS.

Landing Zone Deployment and Operations

We have combined the world-class ITO and managed services expertise from Atos with the AWS Landing Zone Accelerator to provide an automated environment for customer workloads on AWS. Secure, scalable, enterprise-grade and production-ready - setup time is reduced to just days.

Cloud Infrastructure Management

Provisioning of managed Amazon EC2, Amazon S3, and Cloud networks as well as operating system and patch management. Free your valuable IT resources from mundane tasks and the challenge of managing hundreds of 3rd party vendors. Exit the data center business and empower your team to build transformational healthcare solutions.

Cloud Security

Managed Security Services (MSS) are built on AWS using native capabilities to enhance security. CloudCatalyst leverages Atos' expertise in cybersecurity and risk management and AWS' cloud infrastructure, offering cutting edge security solutions that ensure your business is protected throughout its cloud migration journey.

Transforming Healthcare with Atos CloudCatalyst

Enabling IT leaders to empower healthcare organizations with Atos and AWS CloudCatalyst, for a more efficient and innovative future.

- **Special Migration and Assessment Funding:** to support and accelerate migrations to AWS
- **Seamless scalability:** to meet your ever evolving needs as a healthcare organization
- **Innovation:** to streamline your operations by harnessing AWS technology and innovation

So you can continue to provide the best care possible.

Take the first step towards a brighter healthcare future.
