GUIDE 02 OF 10

Creating Your Liquidity Wallet

Your Liquidity wallet holds your cash balance and the assets you own on Liquidity. It is created for you as the final step of finishing setup.

Step by step

1. Finish identity verification first; wallet creation appears as the next step of setup.
2. Review the wallet information screen and confirm to create your wallet.
3. Wait a few moments while your MPC wallet is generated. Do not close the app during this step.
4. When you see the confirmation, open Wallet from the top menu to see your public and private balances.
5. You are now ready to add a bank account and make your first deposit.

Frequently asked questions

When should I create my wallet?

You create your wallet as part of finishing setup, right after your identity is verified. You need a wallet before you can deposit funds or trade.

Do I need to manage private keys or a seed phrase?

No. Your wallet uses multi-party computation (MPC) security, so no single private key is ever stored in one place and you do not need to write down a seed phrase.

Is there a fee to create a wallet?

No. Creating your Liquidity wallet is free.

Can I have more than one wallet?

Each account has one Liquidity wallet. Within it you will see separate balances for public markets and private markets.

What if wallet creation fails or takes too long?

Refresh the page or reopen the app and try again. If it still does not complete, contact support through the Help menu and we will finish it with you.

Securities brokerage services are provided by Liquidity.io LLC, a member of FINRA/SIPC. Equity clearing by Alpaca Securities LLC; cryptocurrency by Alpaca Crypto LLC. Liquidity does not provide investment advice. All investments involve risk, including loss of principal.

Can I connect an outside crypto wallet?

You can deposit crypto from an outside wallet to your Liquidity deposit address, and withdraw to outside addresses you add and whitelist. Outside wallets are not linked as a login method.

Need help? Use the Help menu in the Liquidity app or at markets.liquidity.io, email support@liquidity.io or call +1 (702) 379 5528.
