GUIDE 07 OF 10

The Orders Tab

Orders lists every order you have placed across public markets, crypto, private offerings and secondaries, with its type, side, quantity, price and status.

Step by step

1. Open Orders from the top menu.
2. Review your orders and their status: Open, In progress, Executed or Cancelled.
3. Check the Buy or Sell label on each order card.
4. Select an order to view its details, cancel it while it is still open, or complete settlement steps for a matched trade.

Frequently asked questions

How do I tell my buy orders from my sell orders?

Each order card is labeled Buy or Sell.

What do the order statuses mean?

Open means your order is live and waiting to be filled. In progress means it has matched and is being settled. Executed means it has been completed. Cancelled means it was cancelled by you or expired.

How do I cancel or edit an open order?

Open the order from the Orders tab and choose Cancel (or Edit where available). Orders that have already matched or are in settlement cannot be cancelled from the app.

Where do I complete settlement steps for a secondaries trade?

Open the matched order from the Orders tab. The settlement screen shows each step, such as signing agreements and making payment, and what is still needed from you or the other party.

Will I be notified about my orders?

Yes. You will receive email and in-app notifications when an order is placed, matched, executed or cancelled, and when a settlement step needs your action.
