## DEFENDER SERIES

The DEFENDER series fog systems are manufactured in Italy solely for SecureIt Homes. They are designed to fulfill a duty as an intrusion deterrent for residential and commercial applications.

Using state-of-the-art components and a **harmless** fluid composed of glycol, alcohol, and distilled water, the Burglary Fog Deterrent System emits fog to fill the premises, so unwanted visitors have nearly zero visibility.

Ideal for, but not limited to, pharmacies, liquor stores, gas stations, jewelry stores, pawnshops, dispensaries, firearms dealers, retail stores, warehouses, homes, etc.

The Defender series can be wired into an existing alarm system or deployed as a stand-alone system using “Ajax Security” components (sold separately).
