- **G** **Elastic Strap** for the Avive Rescue Kit.
- **H** **Avive Power Bank** for extending the standby time for the Avive Connect AED®.

Set up the Avive Power Case

Let's get started!

Scan for setup video!

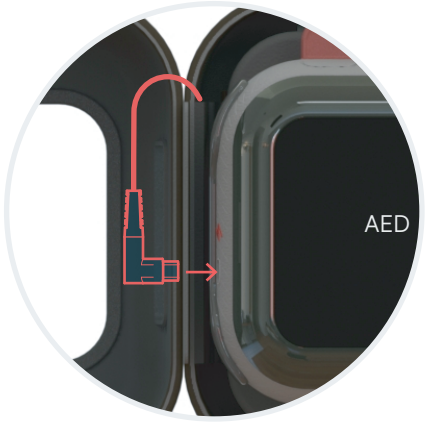
Step 1: Set up the Avive Power Case

A. Verify the Power Bank's battery level by pressing the Power Bank Button (see page 2 for location). If the battery is not fully charged, follow the instructions on page 5 to charge the Power Bank.

B. Fully Charge the Avive Connect AED® before placing it in the Power Case. Use an Avive USB Charging Cable, an Avive USB Power Adapter, and a compatible wall outlet to charge.

C. Secure the Avive Connect AED® in the Power Case's Holding Clamp (see page 2 for location).

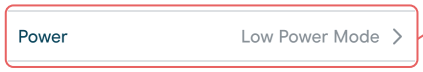
D. Locate the device charging cable inside of the Power Case and plug it into the Avive Connect AED®.

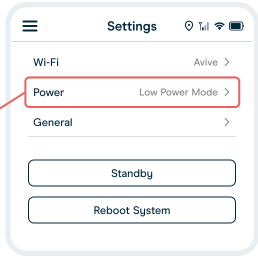


Important: The Power Case's device charging cable **MUST** be plugged into the Avive Connect AED® for the Power Case to function as intended.

Step 2: Turn on Power Bank Mode

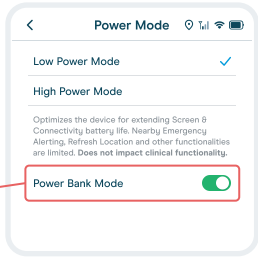
A. If using the Avive Connect AED®, navigate to Settings > Power on the device screen to view device power options.





B. Toggle "Power Bank Mode" **ON**.

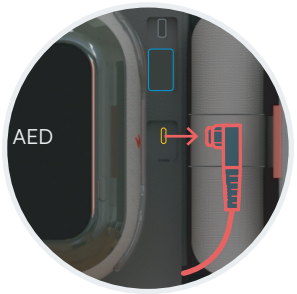
NOTE: This will automatically configure your Avive Connect AED® to maximize Power Case standby time.



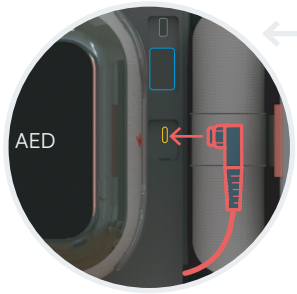
Done! The Avive Power Case will automatically turn on to extend the standby time of your Avive Connect AED®.

Recharging the Avive Power Case

A. When it's time to recharge the Power Bank in your Avive Power Case, first unplug the Power Bank Cable from the USB-C port on the Power Bank.



B. Connect the USB-C end of a compatible charging cable to the USB-C port on the Power Bank. Connect the other end of the cable to a compatible adapter and wall outlet and let charge for 24 hrs or until the battery level reaches 100%.



C. Once the Power Bank is fully charged, unplug the cable and reconnect the Power Bank Cable into the USB-C port on the Power Bank.

Important: The Power Bank Cable **MUST** be plugged into the Power Bank so that the Avive Power Case can charge your device.
