CUWB

REAL-TIME LOCATION SYSTEM

TAGS

Sealed to IPX7
USB-C Power and Data
Battery Options:
Rechargeable 150mAHr
Replaceable CR123

ANCHORS

Long Range up to 100m
Chainable PoE
Sealable to IPX7
Flexible Mounting Options

CUWB SYSTEM

Centimeter-Level Precision
Flexible Channels, Modes and Rates
Scalable to Large Buildings and Warehouses
Transparent Pricing, No Recurring Fees

Submit a floorplan today for a free evaluation!

Pricing & Ownership: "Buy It. Own It."

Buy It. Own It. — Gain total ownership of your real-time location tracking hardware and software without recurring subscription costs or hidden fees.

100% Transparent Pricing — Simple, upfront pricing ensures predictable budgeting without software renewal fees down the road.

Lower Total Cost of Ownership (TCO) — Eliminate long-term enterprise software subscriptions and cut upfront setup costs with a system that pays for itself.

Unrivaled Speed & Centimeter-Level Precision

Centimeter-Level Accuracy — Locate critical assets, equipment and personnel with ultra-precise location data.

Real-Time Data Delivery — Ultra-fast performance with update rates up to 200 Hz per tag and latency under 20 milliseconds.

High-Capacity Tracking — Enterprise-grade throughput supporting over 3,000 location updates per second across thousands of active assets.

Configurable Beacon Rates — Tailor update frequencies from 0.1 Hz to 200 Hz to optimize battery longevity or track high-speed movements.

Cost-Saving Hardware & Simplified Installation

ChainPoE™ Technology — Daisy-chain up to 12 anchors together for power and data, reducing Ethernet cable runs and installation costs by up to 90%.

High-Performance Anchors — Built for long-range coverage, multi-channel operation and flexible mounting in any environment.

Versatile Tags — Lightweight, durable, and energy-efficient tags designed for seamless attachment to assets and offering up to 5 years battery life.

Open Data Access & Custom Engineering

REST API Integration — Easily manage your CUWB system in real time with dynamic tag rates, system status monitoring and live configuration updates.

3D Visual Mapping — Visualize asset trajectories and spatial relationships out of the box with the CUWB Viewer.

Custom Engineering Capabilities — Backed by Ciholas engineers to provide custom enclosures, specialized firmware or hardware integration.

Proven Multi-Industry Reliability — Trusted for demanding applications in warehousing, mining, healthcare, robotics, sports analytics and entertainment.
