

Smarter care.
Better outcomes.
Sustainable savings.

Build a stronger future for
Adult Social Care.

A modular toolkit, integrated into local authority case management systems - linking people, practice and funding.

£3 billion

Potential savings nationwide through optimised care planning and intervention strategies.

£10 million

Could be mitigated over five years through proactive care and smarter decision-making.

25%

Reduction in demand, saving over 8,000 hours in practitioner time via streamlined processes.

110,000+

Budgets assessed annually, accounting for 20% of all personal budgets in England.

Our partner local authorities are consistently ranked in the top third for quality of life measures related to self-directed support and direct payments.

Why councils work with Imosphere

Preventative focus

Track outcomes and reduce demand by up to 25%, minimising strain on services and freeing up resources for those who need them most.

Data-driven decisions

Leverage real-time data to manage resources efficiently and improve citizen outcomes with evidence-backed care plans for assurance.

Efficient budgeting

Accurately assess and forecast care budgets to ensure that every penny is allocated effectively, reducing unnecessary expenditure.

Strengths-based practice

Enable person-centred care that improves outcomes through proactive, preventative care.

Innovating with local authorities for over 30 years, including:

Unlock better outcomes with smarter preventative care

Practical tools that reduce demand, streamline reviews, and deliver sustainable savings for adult social care.

Modular toolkit

From self-assessments to care planning, our tools integrate seamlessly to empower practitioners and ensure positive citizen outcomes.

Smarter care planning

Create outcome-focused care and support plans, with people's well-being and quality of life at the centre.

Faster reviews and reduced delays

Streamline care reviews and reduce waiting lists, enabling more timely interventions.

Enhanced resource allocation

Maximise impact by allocating resources based on real-time data and forecasts, ensuring the right care at the right time.

Modular toolkit highlights

Connected Community: Self-assessments empowering citizens with tailored advice, proactive support and a stronger voice.

Connected Practice: Integrated best-practice assessment tools for strengths-based working, proactive prevention and greater efficiencies.

Connected Funding: Accurate, data-driven funding decisions for financial clarity, consistency and fairness.

Connected Insights: For using data to forecast, plan, and evidence impact.

Achieve sustainable savings

£43.4 million

in savings per council over five years through data-driven decisions and improved operational efficiency.

£10 million

could be mitigated over five years through proactive care and smarter decision-making.

We chose Imosphere's tools because of their strengths-based approach, which prioritises preventative care options and seamlessly transitions to follow-up assessments when necessary.
