Power Apps

- Bespoke custom app development
- Quick and easy based on data
- Integration with Microsoft Ecosystem

Power Automate

- Automate business processes
- Multistage approval processes
- Confidently scale automation

Power BI

- Data visualization reporting
- Real time data
- Interactive charting

Power Pages

- Bespoke low code websites
- Client portals
- Integration with Microsoft Ecosystem

Our services

#1

Rapid development

Too busy to worry about employing a team of developers?

Leave it to us, we'll develop your requirements in collaboration with you.

#2

Expert consultancy

Not sure what this automation lark's all about?

Our consultants will explain everything in clear simple language helping you identify low hanging fruit.

#3

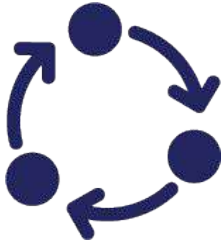

Handheld support

We're there to support you, we will hold your hand throughout our journey and beyond to ensure your automations are providing maximum return on investment.

Our approach

#1

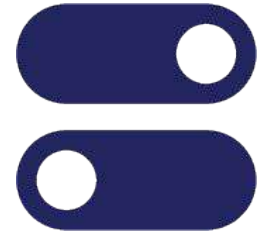

Iterative development

#2

**Continuous feedback
and improvements**

#3

**Flexibility to adapt
to changes**

The benefits

#1

Faster time to market

#2

Higher quality products

#3

Client collaboration
and satisfaction

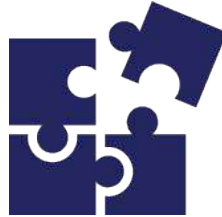

Why us?

#1

**Certified Microsoft Power
Platform Experts**

#2

**Proven track record of
solving complex problems**

#3

**Committed to innovation
and excellence**

Our experience

Salus - Site inspections

Challenge

Manual, paper-based inspection process was time-consuming and prone to errors.

Solution

Developed a custom Site Inspection Power App. Inspectors now dictate or type digital notes, record actions, add images, and complete inspections directly from their mobile devices. The app automates report generation and approval, drastically reducing the time required to deliver reports to clients from weeks to mere minutes.

Features

Digital note-taking, action recording, image capture, and automated report generation.

Technologies Used

Outcome

- Reports delivered to clients in minutes instead of weeks
- Significant time and cost savings
- Improved data accuracy and efficiency
- Enhanced roles for administrators, now involved in creating Power BI reports

Bright, forward thinking and absolutely dedicated.

If you want quality, we have learnt you need forward-thinking people. At Fulcrum Labs, they have exactly that.

Paul Meadows

Managing Director - Salus Approved Inspectors

Our experience

AMRC - Health and safety

Challenge

The process was cumbersome, relying on Excel and emails, causing inefficiencies and compliance risks.

Solution

Developed a Health and Safety Power App. Streamlining form completion, collect signatures, assign IDs, and manage risk assessments efficiently within a single app, while providing real-time site management metrics through a Power BI dashboard.

Features

Seamless form completion, signature collection, ID assignment, and risk assessment tasks. The app includes a real-time dashboard providing site management metrics.

Technologies Used

Outcome

- Ensured compliance with health and safety protocols
- Eliminated the need for Excel spreadsheets, improving efficiency & compliance
- Provided real-time metrics for effective site management, enhancing overall safety

Our experience

Fisher German - Conflicts check

Challenge

Existing conflict of interest check process was slow, time-consuming, and complicated. Reports were unclear and inconsistent, making data difficult to digest and use.

Solution

Developed a Power App to streamline the conflict check process. The app searches several different databases and captures necessary compliance details, automates the search process, and generates concise reports shared promptly with relevant colleagues.

Features

User-friendly interface, automated database searches, and consolidated PDF reports.

Technologies Used

Outcome

- Significant reduction in data collection time, enabling quicker service for staff
- Clear and consistent report formats enhanced professionalism and client confidence
- Reliable results ensured compliance and efficient conflict checks

The thing I like about Fulcrum Labs is that they are just 'easy' to work with. These guys properly tune into your needs and come up with well thought through solutions – and nothing is a problem– it's about how they can help in an open, transparent partnership. Looking forward to continuing the journey!

Simon Pratt

Head of IT - Fisher German

Our experience

Econ Engineering - Familiarisation training

Challenge

The certification process for new drivers was manual and inefficient, involving extensive paperwork and data entry. Delays in certification caused frustration for new drivers eager to start work.

Solution

Developed a Power App to automate the training certification process.

Features

Digital input of trainee details, automated questionnaire validation, digital signatures, and auto generated certificates.

Technologies Used

Outcome

- Significant reduction in data collection time, enabling quicker service for staff
- Clear and consistent report formats enhanced professionalism and client confidence
- Reliable results ensured compliance and efficient conflict checks

The Fulcrum Labs team are a breath of fresh air when it comes to development, they were quick to not only understand our business needs but scope/built and deploy a fully working app without missing a beat, we look forward to a long and productive relationship with them.

Wayne Tench

IT Manager - Econ Engineering
