

DataQI

The future of Enterprise Intelligence

assistant

Generative AI Platform

Enterprise-Grade Generative AI, Built on Unified Intelligence

DataQI Assistant is a secure, enterprise-ready generative AI platform that empowers organizations to build and deploy fully customized AI assistants; tailored to teams, roles, and workflows. Whether answering questions, drafting documents, or surfacing insights, each assistant operates on internal data ensuring accuracy, control, and compliance.

Feature	Description
AI Assistants	Deploys unlimited AI assistants , each fully customized for their specific role, audience, and use case.
Data Integration	Connects to 150+ enterprise systems (e.g., SharePoint, Google Drive, SQL, file shares). Data is securely ingested, indexed for AI use, and updated as source content changes. Custom connectors available for industry tools.
Model Flexibility	Supports multiple LLMs (e.g., OpenAI, LLaMA), including offline models for air-gapped and on-premise environments; avoiding vendor lock-in and ensuring long-term adaptability with the best model for every use case.
Deployment Flexibility	Available as a SaaS or on-premise deployment. Ideal for highly regulated industries with strict data residency and control requirements.
User Management	Enforces SSO and supports major identity providers , including Microsoft Entra ID.
Knowledge Governance	Provides per-assistant control over data access , including the ability to whitelist specific web sources while blocking general internet access—ensuring accuracy and trust.
Tailoring	Tailors each assistant individually—define prompts, tone, access scope, and behavior at the assistant level.
Commercial Model	DataQI Assistant is priced using industry-standard per-user licensing . For large user bases or unique deployment scenarios, consumption-based pricing can be considered on request
Industry Versatility	Supports use cases across industries like manufacturing, healthcare, retail, and finance , etc.
Customization	If out-of-the-box features don't meet your needs, DataQI Assistant supports custom modules to solve specific business challenges.
Advanced Accuracy	Contextualizes enterprise data, intelligently iterates up to 10 times , and ranks responses to deliver the most relevant and high-quality answer.

Saas Deployment

Support

All DataQI Base License customers have 24/7 access to our AI Support Assistant for instant help with common issues.

For anything else, admin users can submit tickets via the platform. Our team responds within 48 business hours.

For tailored support options, please contact us.

Large Language Model

SKU based pricing assumes DataQI selects the large language model used. This may vary to ensure optimal performance within the pricing tier.

Service Availability

DataQI offers a 99.8% monthly uptime SLA. Service Credits are issued for downtime as follows:

Uptime Level	Service Credit (%)
< 99.8%	10%
< 98.0%	25%
< 95.0%	50%

Service Credits apply to the monthly subscription fee for the affected service and are issued as credits on future invoices.

Product Updates & Maintenance

DataQI continuously delivers functionality improvements, security patches, and performance enhancements. Updates are deployed during published standing regional maintenance windows.

Licensing & Pricing Model

Base License

The Base License includes platform access for a defined user count of up to 250 named users, along with usage quotas per user which are aggregated across the platform:

- 1TB of initial data ingestion

Licenses are prepaid monthly. Additional users or features can be added through optional packs.

SKU	Deployment	Type	Description
SA-DATAQI-C-BASE250-12	SaaS	Base License	Base system, includes 250 users, 1TB ingestion
SA-DATAQI-C-BASE250-36	SaaS	Base License	Base system, includes 250 users, 1TB Ingestion

User Add-On Packs

Expand platform access by purchasing User Packs. User add-on packs are co-termed with the Base License and cancellable after 12 months.

SKU	Deployment	Type	Description
SA-DATAQI-C-UP-1H	SaaS	User Pack	100 User add-on pack
SA-DATAQI-C-UP-5H	SaaS	User Pack	500 User add-on pack
SA-DATAQI-C-UP-1K	SaaS	User Pack	1000 User add-on pack

Feature Add-On Packs

These add-on packs enhance DataQI functionality or capacity.

SKU	Deployment	Type	Description
SA-DATAQI-C-FP-10K	SaaS	File Pack	10TB Additional File Ingest
SKU	Deployment	Type	Description
SA-DATAQI-C-SUPPORT	SaaS	Support	Premium support with a Technical Account Manager ¹
SA-DATAQI-C-CUSTOM	SaaS	Customization	Dependant on scoped requirement
SA-DATAQI-C-LLM	SaaS	Customization	Premium LLM model uplift ³

1. Must be added at the time of Base License purchase.

Licensing & Pricing Model

Base License

The Base License includes platform access for a defined user count of up to 250 named users.

Licenses are prepaid monthly. Additional users or features can be added through optional packs.

SKU	Deployment	Type	Description
SH-DATAQI-C-BASE250-12	Self Hosted	Base License	Base system, includes 250 users
SH-DATAQI-C-BASE250-36	Self Hosted	Base License	Base system, includes 250 users

User Add-On Packs

Expand platform access by purchasing User Packs. User add-on packs are co-termed with the Base License and cancellable after 12 months.

SKU	Deployment	Type	Description
SA-DATAQI-C-UP-1H	SaaS	User Pack	100 User add-on pack
SA-DATAQI-C-UP-5H	SaaS	User Pack	500 User add-on pack
SA-DATAQI-C-UP-1K	SaaS	User Pack	1000 User add-on pack

Feature Add-On Packs

These add-on packs enhance DataQI functionality or capacity.

SKU	Deployment	Type	Description
SH-DATAQI-C-SUPPORT	Self Hosted	Support ²	Customized support uplift
SH-DATAQI-C-CUSTOM	Self Hosted	Customization	Dependant on scoped requirement
SA-DATAQI-C-CUSTOM	SaaS	Customization	Dependant on scoped requirement
SA-DATAQI-C-LLM	SaaS	Customization	Premium LLM model uplift ³

2. Must be added at the time of Base License purchase.

3. The standard pricing assumes use of the 4o-mini model for SaaS or Llama model for self-hosted. Customers requesting access to higher-performance or specialist models (e.g., GPT-4o, Claude, Mistral, domain-specific LLMs) may incur additional usage-based charges. Uplifted pricing will be confirmed prior to activation of such models.
