

ETF FACTS

SavvyLong Geared Natural Gas ETF

Ticker: GASU

November 17, 2025

Manager: LongPoint Asset Management Inc.

This document contains key information you should know about SavvyLong Geared Natural Gas ETF. You can find more details about this exchange traded fund ("ETF") in its prospectus. Ask your representative for a copy, contact LongPoint Asset Management Inc. at (416) 861-8383 or info@LongPointETFs.com or visit www.LongPointETFs.com.

Before you invest, consider how the ETF would work with your investments and your tolerance for risk.

This ETF is an alternative mutual fund, as such, GASU is permitted to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds.

This ETF is highly speculative. GASU uses a significant amount of leverage which magnifies gains and losses. It is intended for use in daily or short-term trading strategies by very knowledgeable, sophisticated investors. If you hold this ETF for more than one day, your return could vary considerably from the ETF's daily target return. The negative effect of compounding on returns is more pronounced when combined with leverage and daily rebalancing in volatile markets. GASU is not suitable for investors who do not intend to actively monitor and manage their investments.

Effective November 17, 2025, the management fee for GASU will be reduced from 1.25% to 1.15% per annum. Effective the same date, the Manager will apply a management fee rebate of 0.90%, resulting in a net management fee of 0.25% until June 30, 2026. The Manager may extend the rebate beyond June 30, 2026 and will announce any extension before such date. These changes will result in a lower management expense ratio, which reflects the management fee, applicable taxes and operating expenses.

What does the fund invest in?

SavvyLong Geared Natural Gas ETF seeks daily investment results that endeavour to correspond, before fees, expenses, distributions, brokerage commissions and other transaction costs, to up to two times (2X) the daily performance of its underlying benchmark (the "Daily Target"). The Daily Target which GASU seeks exposure to is currently the Solactive Natural Gas Rolling Futures Index, which is calculated in U.S. dollars. GASU does not hedge its currency exposure to the U.S. dollar. For information on the Daily Target, visit www.solactive.com.

Top 10 Investments (September 30, 2025)

Cash and Cash Equivalents	85.3%
Forward Agreements	14.7%

Total percentage of top 2 investments	100.0%
Total number of investments	2

Investment Mix (September 30, 2025)

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

LongPoint Asset Management Inc. has rated the volatility of this ETF as **High**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Ratings of the Geared ETFs" and "Risk Factors" sections of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how shares of the ETF have performed with returns calculated using the ETF's net asset value (NAV).

Year-by-year returns

This section tells you how shares of the ETF have performed in past calendar years. However, this information is not available because the ETF has not completed a calendar year.

Best and worst 3-month returns

This section shows the best and worst returns for shares of the ETF in a 3-month period. However, this information is not available because the ETF has not completed a calendar year.

Average return

This section shows the value and annual compound rate of return of a hypothetical \$1,000 investment in shares of the ETF. However, this information is not available because the ETF has not yet completed 12 consecutive months.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and NAV.

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can affect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF shares. The ask is the lowest price a seller is willing to accept if you want to buy ETF shares. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: **market orders** and **limit orders**. A market order lets you buy or sell shares at the current market price. A limit order lets you set the price at which you are willing to buy or sell shares.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?
A word about tax

Investors who:

- Seek leveraged daily exposure to natural gas futures
- Are comfortable with a high level of risk
- As this ETF is highly speculative and uses a significant amount of leverage which magnifies gains and losses, this ETF is only intended for use in daily or short-term trading strategies by very knowledgeable, sophisticated investors

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, ETF distributions are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell shares of the ETF. The fees and expenses – including trailing commissions – can vary among ETFs. Higher commissions can influence representative to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage Commissions

You may have to pay a commission every time you buy and sell shares of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns. The ETF's expenses are made up of the management fee, operating expenses and trading costs.

As of June 30, 2025, the ETF's expenses were 2.51% of its value. This equals to \$25.10 for every \$1,000 invested.

Management expense ratio (MER)	Annual rate (as a % of the ETF's value)
This is the total of the ETF's management fee and operating expenses.	2.00%
Trading expense ratio (TER)	
These are the ETF's trading costs.	0.51%
ETF expenses	
The amount included for ETF expenses is the amount arrived at by adding the MER and the TER.	2.51%

3. Trailing Commission

A trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF does not have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.
