Investment Strategy

The ForAll Core & More U.S. Equity Index has a static component that tracks a U.S. equity Fossil Fuel Free Index.

There is an alpha seeking component that dynamically allocates between a leveraged ETF and a volatility ETF using a rules based algorithm resulting in a maximum of 1.3x leverage.

There is a strategic asset allocation component that dynamically allocates between the U.S. equity Fossil Fuel Free Index and gold, again using a rules based algorithm.

Reasons to Invest

- Exposure to U.S. equities with emphasis on the tech sector.
- Moderate leverage of 30% provides the potential for better returns, and the asset allocation strategy of the index has historically provided similar downside to broad U.S. equity markets.
- The ETF charges no management fee during months when the return is negative.
- Reduced exposure to fossil fuels compared to the broad market.
