

PRECIP™

HYDRATION AND INFILTRATION

Soil surfactants are chemistries which aid in the efficient and responsible management of water. At Precision Laboratories, we understand the need for developing products to help turfgrass managers with proactive water management solutions for all areas of their property.

PRECIP™ is a water conservation soil surfactant balancing performance with affordability. It is a specific blend created to enhance the infiltration of water and increase soil hydration over extended periods of time.

FEATURES & BENEFITS:

- Increased water infiltration to optimize irrigation and rain inputs
- Longer hydration for water and labor savings over time
- Affordable cost for expanded use over large acreage

USE RATES:

- 2-8 fluid ounces per 1000 ft²
- Reapply every 14-28 days at the 2-4 fluid ounces per 1,000 ft² rate. Use higher labeled rates for longer duration.

PACKAGE SIZES:

- 2 x 2.5 gallon case
- 20 gallon drum
- 55 gallon drum
- 275 gallon minibulk
