

THE K2 MARKET REVOLUTION BEGINS HERE

Vitamin K2 revolution

Pharmaquinone
single peak vitamin K2

Vitaquinone
The new solvent free vit. K2

14 years since first synthesis path

It's been almost 14 years since the first synthesis path for Menaquinone-7 has been launched. The wait was undoubtedly worthwhile.

Now VitaSynth is challenging the market with its third generation synthesis technology. Capitalising on our 14 years of experience in manufacturing and elementary research, we proudly bring in Vitaquinone® range of solvent free Vitamin K2 active and dilutions.

Our journey

Vitamin K2 introductory meetings at Vitafoods Geneva between Nattopharma ASA and EuroPharma Alliance

VitaSynth (a sister company to EuroPharma Alliance) is incorporated and signs MK-7 synthesis development agreement with an academic partner

VitaSynth sells the patent to Nattopharma ASA, retains the manufacturing rights

VitaSynth fills second generation synthesis patent

VitaSynth gets second generation synthesis patent in first EU country

New plant, new capacity

Factory expansion

2012

2013

2017

2020

2021

2023

2024

2025

2026

EuroPharma Alliance becomes sole distributor of Nattopharma in Central East Europe

VitaSynth fills first generation synthesis patent

VitaSynth moves commercial production of vitamin K2 from Pharmaceutical Institute to own facility

Pharmaquinone range is launched globally at Vitafoods Geneva

Launch of Vitaquinone solvent free range

Pharmaquinone received a patent in the US market

Organic product portfolio

Vitaquinone® and Pharmaquinone® are the Menaquinone-7 actives and a range of oil and powder dilutions:

Active Ingredient		
>99% Active Ingredient	✓	✓
Working standard	●	✓

Oil Dilutions		
5% MCT Oil	✓	✓
4.75% MCT Oil	✓	●
1% MCT Oil	✓	✓
0.45% Olive Oil	✓	✓
0.15% MCT Oil	✓	✓
Organic products		

Powders		
1% MCC Powder	✓	✓
0.25% MCC Powder	✓	✓
0.2% MCC Powder	✓	✓
0.2% Maltodextrin Powder	✓	✓

Our story is purity

Our assay tests of the active ingredient (*all-trans* K2 MK-7) regularly exceed 100%. It means our production is more potent than the official reference standard. Our active ingredient isomeric purity constantly reaches 100% (no *cis* isomer detected by USP Method). This is the pharmaceutical definition of our product.

Other synthetic K2 products do not offer purity standardization and the "natural" Vitamin K2 is standardised to 98% purity due to mandatory MK-6 impurity.

Superior to US Pharmacopeia®

The official USP method is no longer a guarantee of purity – it is a legacy standard that fails to address modern chemical challenges. While the market sticks only the Vitamin K2 assay and *cis* MK7 ratio hiding behind the "USP® Compliant" label, they ignore the true benchmark of quality which is the comprehensive purity.

Our analytical team has proven that USP® methods are technically blind to a vast range of impurities that can be found in low-cost Chinese vitamin K2.

The "Green Light" for Contaminants (The USP® method "Green Light")

By focusing strictly on the *cis*-isomer and MK-6 ratios, the USP® method effectively ignores a "chemical jungle" of other substances.

Cheap synthetic Vitamin K2 is a uncontrolled mixture of different isomers, which are visible, but not calculated properly in the USP® method.

At Vitasynth we now know, that cheap fermented Vitamin K2 consist serious amounts of impurities that are not detectable under USP® method as well as other available HPLC methods.

We See What Others Miss

At Vitasynth, we refuse to accept "unknown" impurities. Our advanced methodology exposes the contaminants that pass USP tests but fail our rigorous protocols. **Pharmaquinone® and Vitaquinone® mean a True Single Peak. We don't just comply with the USP – we go beyond it, because your health shouldn't depend on an outdated filter.**

We follow these industry standards:

Halal

Kosher

GMP Food
Hygiene
Certified

GMO Free -
tested

FDA -
inspected

Vegan

TÜV Rheinland

Our products vs official reference standard

Our standard production batches regularly surpass the official reference standard in purity and assay. Therefore we believe Vitaquinone® most likely surpasses all other vitamins K2 on the market.

CERTIFICATE OF ANALYSIS

Product name	Pharmaquinone®99% Active Ingredient Vitamin K2 as MK-7
SKU code	API
Batch number	API2304-2
Best before	24 months from manufacture
Manufacturing date	April 2023
Expiry date	May 2025
Storage	The packed Product should be stored in temperature 5-25 °C and humidity 30-50%. Protect from the light.
Packaging	HDPE containers intended for contact with food, protecting light-sensitive contents.

TESTS	REQUIREMENTS	RESULTS
Description: Visual determination	Yellow crystalline powder	Complies
Identification		
IR spectrum (KBr)	Corresponds to the standard IR spectrum	Complies
HPLC	Corresponds to the standard HPLC profile	Complies
Assay of vitamin K2 (MK7) (UPLC method*)	Not less than 99.0% - not more than 101.0%	100.65 %
Related substances (UPLC method*)		
Total impurities	Not more than 1.00%	< 0.03 %
Assay of vitamin K2 (MK7) (USP method)	Not less than 99.0% - not more than 101.0%	100.26 %
Isomeric purity (USP method)		
Content of cis-menaquinone-7	Not more than 1.00%	Not detected
Loss on drying	Not more than 0.50%	0.19 %
Sulphated ash	Not more than 0.10%	0.02 %
Residual solvents		
Ethanol	Not more than 1000 ppm	Not detected
Ethyl acetate	Not more than 2000 ppm	< 30 ppm
Heavy metals		
Arsenic	Not more than 2 ppm	< 0.33 ppm
Cadmium	Not more than 1 ppm	< 0.33 ppm
Lead	Not more than 3 ppm	< 0.41 ppm
Mercury	Not more than 0.1 ppm	< 0.10 ppm

Third party testing results

Our 100.2% API CoA

These are the CoAs (Certificates of Analysis) for our API2304-2 production lot of Pharmaquinone® 99% Active Ingredient.

Eurofins 101.7% CoA

Eurofins is among most reputable independent laboratories in the world. We have chosen them as our reference lab to validate our in-house quality control methods.

Can vitamin be more than 100% pure?

Both our lab and a third-party lab demonstrate higher potency in our regular production compared to the official reference standard. If the standard purity is deemed as 100%, a more pure product will score above 100%.

Vitaquinone is
solvent-free Vitamin

It **does not contain hexane, acetone and other chemical solvents**. They are often used in the purification process of fermented and synthetic vitamin K2

The Capacity

Our scalable production can meet the global demand for vitamin K2-Mk7. Our new factory located just outside of Warsaw welcomes your audits. We are planning a factory expansion in 2026 to support our continued growth and increasing production capacity.

Beware of cheap vitamin K2

We found out it was the
most expensive K2 ever.

Cheap vitamin K2 from Asia (Goodscend & Seebio)

Trans vitamin K2 MK-7: **11,6%**
Total impurities: **88,4% (unknown chemicals)**

Vitaquinone

Trans vitamin K2 MK-7: **100%**
Total impurities: **Not detected**

What is Bioengineering

The use of genetic
modifications, manipulations
of metabolic pathways, non
traditional substrates and
chemical solvents may seem
excessive to consumers seeking
natural fermentation. These methods
alter traditional processes and raise
concerns about safety, labeling
transparency, and regulation.

Discover our **non-bioengineered** vitamin K2

The K2 market revolution has started.
