File No.: 74349.1

I, WADE TYLER ENO, of the Town of Sylvan Lake in the Province of Alberta, SWEAR AND SAY THAT:

1. I am a Director and the Chief Operating Officer of ONSITE3D Ltd., ONSITE3D Industrial Services Ltd., and ONSITE3D Digital Solutions Ltd. (each a "**Company**" and collectively, the "**Companies**" or **Onsite3D Group**"), and as such, I have personal knowledge of the facts and matters hereinafter deposed to, except where stated to be based on information and belief, and where so stated, I believe the same to be true.
2. I make this Affidavit further to my First Affidavit of Wade Tyler Eno sworn July 3, 2026 in these Proposal Proceedings (the "**First Affidavit**"). Capitalized terms not defined herein shall have the meaning ascribed to them in the First Affidavit.
3. I swear this Affidavit in support of the Companies' Application for a Second Extension Order (the "**Application**") seeking an extension of the period within which the Companies are required under section 50.4(8) of the *Bankruptcy and Insolvency Act*, RSC 1985, c B-3 (the "**BIA**") to file a proposal, by an additional 45 days to October 20, 2026, pursuant to section 50.4(9) of the *BIA* (such period, as extended from time to time, being the "**Stay**

Period", and the date on which the Stay Period expires being the "**Expiry Date**"), and for a sealing order over the Confidential Exhibits (as defined herein).

Background

4. ONSITE3D Ltd. ("**Onsite3D**"), ONSITE3D Industrial Services Ltd. ("**Onsite3D Industrial**"), and ONSITE3D Digital Solutions Ltd. ("**Onsite3D Digital**") are incorporated pursuant to the laws of the Province of Alberta.
5. Onsite3D Group is an Indigenous-owned business group recognized as a Certified Indigenous Business by the Canadian Council for Indigenous Business. Its business model combines engineering, construction, and procurement ("**EPC**") work, with the Onsite3D Group acting as an Indigenous prime contractor that can both manage projects and perform key technical work itself.
6. Prior to filing the NOIs, the Onsite3D Group was preparing for a business reorganization which was aimed at finding a buyer or partner for the Companies' manufacturing operations while focusing the Companies' future growth on its digital engineering operations.
7. The wind-down and attempted marketing and sale of the manufacturing platform has increased the cash burn of the Onsite3D Group significantly, as there has been no manufacturing revenue generated by Onsite3D Industrial, despite ongoing obligations to maintain physical assets and Lease obligations.
8. As detailed in my First Affidavit, the Companies owe substantial amounts to secured creditors, the Canada Revenue Agency ("**CRA**"), and are subject to several outstanding judgments, claims, and proceedings.
9. The Companies owes substantial pre-filing amounts to the CRA in unremitted source deductions and unremitted Goods and Services Tax ("**GST**") as follows:
 - (a) Onsite3D owes approximately \$1,625,607.07 in unremitted source deductions and approximately \$695,595.43 in unremitted GST;
 - (b) Onsite3D Industrial owes approximately \$2,787,473.29 in unremitted source deductions and approximately \$377,253.69 in unremitted GST; and
 - (c) Onsite3D Digital owes approximately \$2,478,221.04 in unremitted source deductions and approximately \$586,561.19 in unremitted GST
10. The Companies also collectively owe approximately \$139,772.92 for unremitted post-filing amounts to the CRA for pay periods 14, 15, and 16.
11. The main financiers of the Onsite3D Group are two factoring companies – Capital Now Ventures Inc. ("**CNV**"), and 1146991 Alberta Inc. ("**114**").
12. Onsite3D is indebted to 114 in the approximate amount of \$14,067,982.
13. Onsite3D is allegedly indebted to CNV in the approximate amount of \$751,529.73, which amounts are in dispute and subject of the CNV Action as described in the First Affidavit.

14. Although the Onsite3D Group continues to generate cash flow and has recently been awarded additional high-value contracts, as detailed below, this cash flow is insufficient to service its obligations.

Notice of Intention to Make a Proposal

15. On June 22, 2026, each of the Companies filed a Notice of Intention to make a Proposal (“**NOI**”) pursuant to section 50.4 of the *Bankruptcy and Insolvency Act*, RSC 1985, c B-3 (the “**BIA**”) with the Office of the Superintendent of Bankruptcy. G. Chan & Associates Inc. was appointed as proposal trustee in each of the proceedings (the “**Proposal Trustee**”).
16. On the application of the Companies, this Court granted an Order extending the stay of proceedings to September 5, 2026, granting an administration charge on the Companies’ property in favour of the Companies’ counsel and the fees of the Proposal Trustee and its counsel (the “**Administration Charge**”), and administratively consolidating the three estates into one proceeding under Court of King’s Bench Action no. 24-3389146 (B303 389146) on July 9, 2026 (the “**First Extension Order**”).
17. Since the NOI filing, the Companies have:
 - (a) worked cooperatively with the Proposal Trustee to manage cashflow;
 - (b) worked diligently with the Proposal Trustee and its legal counsel to identify and quantify creditor claims;
 - (c) solicited potential interim financing agreements with interim lenders;
 - (d) negotiated and entered into the DIP Term Sheet with the Interim Lender;
 - (e) solicited back-up financing from other potential lenders when the DIP Loan did not fund;
 - (f) hired a Chief Financial Officer, whose start date has been delayed due to restricted cash flow;
 - (g) obtained letters of support from Indigenous communities, educational institutions, and industry;
 - (h) worked on a restructuring plan involving a coalition of Indigenous Nations;
 - (i) secured approval for new contracts which would generate value for the Estates; and
 - (j) acted and are continuing to act in good faith and with due diligence in completing the preliminary work and preparation with efforts to make proposals to their creditors.

Interim Financing

18. Since the commencement of these Proposal Proceedings, the Companies have acknowledged that interim financing was required in order to meet their post-filing obligations. The Cash Flow Statements prepared by the Companies for the period

commencing June 22, 2026 to September 18 2026 were based on the assumption that interim financing was obtained by no later than the week ending July 17, 2026.

19. Unfortunately, despite the Companies' efforts, they were unable to secure interim financing by that deadline. On July 21, 2026 the Proposal Trustee filed a Material Adverse Change Report (the "**First MAC Report**") informing Onstie3D Group's creditors and the Court that the Companies did not have the cash flow required to sustain the projections in the Cash Flow Statements.
20. Given the urgency of the situation, the Companies negotiated and entered into an interim financing term sheet (the "**DIP Term Sheet**") with a related company, Turtle Island Engineering & Consulting Ltd. ("**Turtle Island**", or the "**Interim Lender**").
21. Turtle Island is a recently incorporated entity. I am the sole director and shareholder of Turtle Island. Turtle Island has no assets and was sourcing the funds for the interim financing (the "**DIP Loan**") from upstream lenders, including the Companies' major creditor, 114 (the "**Source Lenders**").
22. After the Companies executed the DIP Term Sheet, I was advised by the Source Lenders that the funds were forthcoming.
23. On the application of the Companies, this Court granted an order approving the DIP Term Sheet entered into between the Companies and Turtle Island for the DIP Loan, and granted an associated charge over the Companies assets in favour of Turtle Island (the "**DIP Financing Approval Order**") on July 22, 2026.
24. Despite being advised by the Source Lenders that the funds were being made available to Turtle Island, the DIP Loan was ultimately never advanced.
25. To my understanding, the main reason for the delay in the advancement of funds is that the funds which were intended to flow to Turtle Island are held in investment accounts which either one or both of the Source Lender have been unable to liquidate as at the date of this Affidavit.
26. Given the fact that the DIP Loan was not advanced, the Proposal Trustee issued a second Material Adverse Change Report on August 26, 2026 (the "**Second MAC Report**").

Upcoming Projects

27. The Onsite3D Group continues to perform existing contract work, as well as compete for and obtain new contracts.
28. Historically the Companies have done a large portion of their revenue in the fall, due to the summer slow down in the industry.
29. As such, Onsite3D management has been spending ample time traveling to meet with current and prospective clients and industry partners, as well as Indigenous communities.

Partnerships with Indigenous Communities

30. As commercial arrangements with Indigenous Nations require protocol, Indigenous members of the Onsite3D Group, including myself, have been spending time in community with the leadership of several First Nations. This includes participating in ceremony and discussing how Onsite3D can use its digital engineering technology and skill to complete commercial projects in partnership with the Nations, as well as provide training and employment opportunities to community members.
31. As a result of these efforts, Onsite3D obtained a Band Council Resolution with Kehewin First Nation, approving a science, technology, engineering and mathematics-based workforce training program (the "**Training Program**") to help Indigenous youth and young adults gain experience working with advanced digital technologies.
32. The Training Program is set to be delivered by Onsite3D Group in partnership with educational and industry partners, including Imperial Oil and the Northern Alberta Institute of Technology ("**NAIT**").
33. Imperial Oil has committed to supporting the Training Program by providing information, education, and career support to participants of the Training Program. A letter of support from Imperial Oil dated July 6, 2026 is attached as **Exhibit "A"** to my Affidavit.
34. NAIT has committed to supporting the Training Program by providing curriculum development and course delivery services. A letter of support from NAIT dated July 27, 2026 attached as **Exhibit "B"** to my Affidavit.
35. Attached as **Exhibit "C"** to my Affidavit is the advertisement for a recent community event put on by Onsite3D at Kehewin Cree Nation to promote the Training Program and provide live tech demonstrations and career coaching.
36. The Training Program is funded in part through the Government of Alberta's Indigenous Employment Training Partnerships Program. Onsite3D Group expects that the Training Program will be funded in September 2026.
37. The Training Program has been endorsed by Turtle Island Group ("**TIG**") as representing an important step towards advancing Indigenous participation, ownership, and leadership in the digital, engineering, and technology sectors.
38. TIG is an Indigenous-owned coalition of Nations, communities, and development leaders committed to advancing economic sovereignty, investment readiness, and sustainable development across Indigenous territories.
39. TIG works with industry, government, and institutional partners to remove the barriers Indigenous people face with respect to economic participation in Canada.
40. A letter of endorsement from TIG regarding the Training Program is attached as **Exhibit "D"** to my Affidavit.
41. Onsite3D has also been in discussions with multiple other First Nations regarding the Training Program, and potential commercial projects.

Plan for Restructuring

42. Management of Onsite3D Group is currently drafting an agreement with TIG, whereby TIG would acquire a majority stake in the ownership of Onsite3D Group. The funds from that transaction (or a separate transaction should a sales process be conducted using the TIG offer as a stalking horse bid) would be used to fund a proposal to the Companies' creditors.
43. TIG sees value in Onsite3D Group's prime contracting, engineering and construction capacity and digital engineering capabilities, which would provide the technical data required to substantiate and value land claims as well as other claims of First Nations which require advanced engineered data.
44. Onsite3D Group would benefit from this ownership structure, as it would enable it to obtain access to government contracts and programs which have been set-aside for Indigenous businesses, as well as expand its network of Indigenous community relationships and therefore business opportunities.

Need for Extension

45. Since filing the NOI on June 22, 2026, the Companies have been diligently working toward formulating a proposal to their creditors but require additional time to complete this process. The first 45-day extension period within which the Companies are required to file a proposal expires on September 5, 2026. The Companies respectfully request an extension of 45 days, to October 20, 2026.
46. The Companies require additional time to, among other things: (i) continue its discussions with the Proposal Trustee regarding the identification and quantification of all creditor claims; (ii) continue to negotiate a draft agreement which would place majority ownership of Onsite3D in the hands of an Indigenous coalition; (iii) find a replacement interim lender to fund the Companies' ongoing operations during the Proposal Proceedings; and (iv) formulate and present a viable proposal to its creditors. The Companies anticipate that the requested 45-day extension to October 20, 2026 will provide sufficient time to advance these objectives materially.
47. I believe that the statutory preconditions for an extension under section 50.4(9) of the *BIA* have been satisfied: (i) the Companies have acted and continue to act in good faith and with due diligence; (ii) the Companies would likely be able to make a viable proposal if the extension were granted; and (iii) no creditor would be materially prejudiced if the extension were granted.

Good Faith Efforts

48. The Companies have acted and continue to act in good faith and with due diligence in completing the preliminary work and preparation necessary to formulate a proposal to their creditors.
49. Since the NOI filing, the Companies have cooperated fully with the Proposal Trustee and have provided all requested information and documentation.

Creditor Support

50. It is my understanding that 1146991 Alberta Inc., a major secured creditor of the Onsite3D Group, is supportive of the Second Extension Order.

51. It is also my understanding that the CRA is supportive of the Onsite3D Group's Application for a Second Extension Order.
52. Attached to my Affidavit as confidential **Exhibit "E"** is a copy of an appraisal with an effective valuation date of May 2, 2025 (the "**May 2025 Appraisal**"), relating to certain property of ONSITE3D Industrial Services Ltd., comprising picker trucks, equipment trailers and a tool-crib trailer, together with the tools, safety equipment, consumables and related field equipment associated with those vehicles and trailers.
53. Attached to my Affidavit as confidential **Exhibit "F"** is a copy of an appraisal report dated November 5, 2025 (the "**November 2025 Appraisal**"), relating to a separate portfolio of property of ONSITE3D Industrial Services Ltd., comprising principally robotic welding systems and other welding and shop equipment, geomatics and surveying equipment, computer and information-technology equipment, office contents and light-duty vehicles.
54. Attached to my Affidavit as confidential **Exhibit "G"** is a copy of an appraisal report dated July 10, 2026 (the "**July 2026 Appraisal**", and combined with the May 2025 Appraisal and the November 2025 Appraisal, the "**Appraisals**", or "**Confidential Exhibits**"), relating to a combined but narrower portfolio of property of ONSITE3D Industrial Services Ltd., comprising selected picker trucks, trailers and related equipment appraised in May 2025, selected vehicles, robotic and conventional welding and shop equipment, geomatics and surveying equipment, and computer equipment appraised in November 2025, together with certain additional vehicles and a trailer. This appraisal was conducted for the purposes of providing valuation information to potential interim lenders who were interested in the more substantial assets of the Companies.
55. The May Appraisal and November Appraisal provide opinions of fair market value for their respective portfolios of property described above.
56. The July Appraisal provides an aggregate forced liquidation valuation for the narrower combined portfolio described above. I understand that valuation to represent the estimated gross proceeds from a sale under compulsion or extreme time pressure rather than an orderly sale, and it demonstrates that realizations would be materially reduced in an immediate distressed sale. It therefore indicates the limited pool of asset value that would be available for creditor recoveries in a liquidation, before taking into account the Administration Charge, CRA's deemed trust claim, valid security interests, and costs of realization.
57. Based on the Appraisals, I believe that little value in the equipment would likely be available for distribution to creditors other than equipment lenders that may hold purchase-money security interests and the CRA. If the Companies were liquidated, I believe they would likely cease operating as a going concern, with the result that any goodwill value and future revenue associated with their ongoing operations would be eliminated.
58. For clarity, the term "Confidential Exhibits" means the three Appraisals attached to this Affidavit as confidential exhibits—namely, (i) the appraisal with an effective valuation date of May 2, 2025; (ii) the appraisal report dated November 5, 2025; and (iii) the appraisal report dated July 10, 2026—in each case together with the valuation worksheets and schedules forming part of the applicable report. The Companies believe that the Confidential Exhibits are commercially sensitive because they contain asset descriptions and valuations that could compromise the Companies' ability to maximize value for their

creditors. The Companies therefore seek an order that the Confidential Exhibits remain sealed on the Court file until the earlier of (i) acceptance of a proposal by the requisite statutory majority of the Companies' creditors; or (ii) sale of the property appraised in the Confidential Exhibits in these proceedings, or any related insolvency proceedings.

Benefit of Proposal Proceedings Relative to Bankruptcy

59. I believe that the Proposal Proceedings offer a significantly better outcome for the Companies' creditors and other stakeholders than would result from a bankruptcy. Onsite3D, the main economic driver of the Onsite3D Group, continues to preform specialized work pursuant to its digital engineering platform contracts. In a bankruptcy, the assets of the Companies — including specialized robotic, digital technology, and engineering equipment — would likely be liquidated under distressed conditions, resulting in significantly reduced realizations for creditors.
60. Furthermore, the Companies have been working to gain the trust of First Nations leadership as well as government approvals required to access dedicated contract work set-aside for Indigenous owned businesses. In a bankruptcy, those opportunities would vanish.
61. By contrast, the Proposal Proceedings provide the Companies with the opportunity to restructure their obligations, reorganize their operations, and continue operating for the benefit of all stakeholders, including creditors, employees, and clients that depend on the Companies' operations. The Companies' management team is taking steps to reduce operating costs of the Onstie3D Group, win lucrative contracts and grant work that will boost cash flow, and secure replacement interim financing. With this additional 45 day extension, I believe the Companies will be in a position to present a viable proposal to their creditors.

Conclusion

62. To the best of my knowledge, information and belief, no creditor of the Companies will be materially prejudiced if the Companies were granted an extension of time of 45 days (i.e., until 11:59 p.m. Mountain time on October 20, 2026) to file a proposal to its creditors.
63. I make this Affidavit in support of the Companies' Application for a Second Extension Order, an order sealing the Confidential Exhibits, and for no other or improper purpose.

Indigenous Partnerships

Alberta Ministry of Jobs, Economy, Trade and Immigration

July 6th, 2026

RE: Letter of Support for Kehewin INDigital Workforce Training Program (Cohort 1)

To the Indigenous Partnerships Team,

Imperial Oils Socioeconomic team is pleased to provide this letter of support for the Kehewin INDigital Workforce Training Program partnership between Kehewin Cree Nation, INDigital, and Onsite3D.

As an industry partner active in Alberta's energy and infrastructure sector, we recognize the value of building Indigenous technical capacity in geomatics, skills directly relevant to the facility documentation, as-built verification, pipeline and site survey, and asset-management work our process facilities rely on. Programs that connect Indigenous participants to these emerging technical pathways advance both regional workforce development and our shared commitment to meaningful Indigenous economic participation and reconciliation.

In support of this program, **Imperial Oil** is prepared to:

- Participate in the program's Industry Day through a presentation on workforce needs, safety culture, and workplace expectations in the energy and industrial sector;
- Provide employer representatives or Indigenous Relations team members to engage participants through networking and career-pathway discussions;
- Offer site visits, job shadowing, or conditional work-exposure opportunities where operational needs, safety requirements, site access, and hiring availability allow;

We understand this letter reflects our intent to support the program's employment-pathway objectives and does not constitute a guarantee of employment.

We commend Kehewin Cree Nation, INDigital, and Onsite3D for this initiative, and we support its delivery.

Sincerely,

Julie Waine

Socioeconomic Advisor

DEPARTMENT OF CORPORATE
AND CONTINUING EDUCATION

July 27, 2026

To whom it may concern,

The Northern Alberta Institute of Technology (NAIT) Indigenous Partnerships and Engagement unit would like to express our support for the development and subsequent delivery of an Indigenous community-led geomatics program alongside Onsite3D.

NAIT Indigenous Partnerships and Engagement has led the development and delivery of hundreds of customized training programs which have been delivered to the specifications of our Indigenous community partners for more than 20 years. With access to a curriculum development team housed within our Corporate and Continuing Education's Product Development Operations, NAIT has the experience and expertise to develop an introductory geomatics program for in-community delivery.

Should Onsite3D's funding proposal be accepted, NAIT will be able to propose curriculum development and course delivery services to Onsite3D to assist them in workforce development in at least one Indigenous community.

We are excited to play a role in the further development of a community-based workforce in Alberta, and are looking forward to exploring future collaborations with Onsite3D should its funding proposal be accepted.

Sincerely,

Carmelita Crisp

Senior Manager – Indigenous Partnerships & Engagement

TURTLE ISLAND
G R O U P

TURTLE ISLAND GROUP

Indigenous Strength. Indigenous Prosperity. Indigenous-Led Futures.

June 9, 2026

To Whom It May Concern,

Re: Letter of Endorsement - Turtle Island Group x ONSITE3D INDigital Partnership Program

On behalf of Turtle Island Group, I am pleased to provide this formal letter of endorsement for the Turtle Island Group x ONSITE3D INDigital Partnership Program.

This partnership represents an important step forward in advancing Indigenous participation, ownership, and leadership in the digital, engineering, and technology sectors. The INDigital Partnership Program has been developed to create meaningful pathways for Indigenous learners, workers, communities, and industry partners to engage with applied STEM education, digital engineering, field technology, and real-world project execution.

Through this initiative, Turtle Island Group and ONSITE3D are working together to support Indigenous capacity building in areas that are increasingly critical to the future of industry, including STEM-based training, digital engineering, digital twin technology, 3D laser scanning, LiDAR, spatial data capture, engineering, fabrication, construction technology, data sovereignty, Indigenous-led digital infrastructure, and applied learning connected to real industry projects.

Turtle Island Group endorses this program because it aligns with our commitment to Indigenous economic reconciliation, community-based opportunity, and the development of practical skills that can support both local capacity and industry-wide transformation. We believe the INDigital Partnership Program creates a strong platform for collaboration between Indigenous communities, technology leaders, engineering professionals, and industrial partners.

ONSITE3D brings recognized experience in digital engineering, 3D scanning, advanced fabrication, industrial project execution, and applied technology integration. Their capabilities, combined with Turtle Island Group's Indigenous-led mandate and community-focused approach, create a partnership model that is both technically credible and culturally grounded.

We encourage industry partners, project owners, funding organizations, and community leaders to support this initiative. The INDigital Partnership Program provides a meaningful opportunity to invest in Indigenous talent, strengthen STEM participation, and build the next generation of Indigenous technical professionals.

Turtle Island Group is proud to endorse this partnership and looks forward to working with ONSITE3D and industry partners to advance this important work.

Respectfully,

Ralph Makokis Sr., M.Sc
VP - Indigenous Skills, Employment
and Training
Turtle Island Group

Christian Starr-Horse
INDigital Program Director
Turtle Island Group
