

■ the guide to safety solutions

featuring

**ProWorks® Protective Wear safety products meet the safety needs of businesses today.**

Costly workplace accidents can be prevented when you have the proper protection products available to your workers. HOSPECO carries an array of high quality safety products to assist you in assuring workplace safety and government compliance.

**Hand Protection**

The ProWorks® glove line consists of both disposable gloves and reusable work gloves. ProWorks® offers a complete line of both examination and general purpose disposable gloves in latex, nitrile, vinyl, and polyethelene. They are offered in powdered or powder free and in various thicknesses and the most popular colors. Color plays an important part in the workplace to prevent cross contamination and to readily ascertain proper use and compliance. ProWorks® gloves are used in these applications - healthcare, food services, environmental service, safety, and all other personal protection applications.

**Facility Protection**

HOSPECO's line of safety products includes specialty hi-visibility prevention products for DOT and the workplace to warn of high risk locations. Safety cones and caution tape alert to potential dangers. ProWorks® safety cones meet the specifications in the Manual For Uniform Traffic Control Devices and the National Cooperative Highway Research Program Report 350.

**Eye Protection**

The HOSPECO line of Safety Eyewear complies with the ANSI Z87.1 standard that sets forth requirements for the design, construction, testing, and use of eye protection devices, including standards for impact and penetration resistance. All safety glasses used by employees under OSHA jurisdiction must meet the ANSI Z87.1 standard.

**Breathing Protection**

HOSPECO carries N95 disposable respirators that are NIOSH approved for use in filtering particulate when no oil (N) is present. The 95 means the filter is at least 95% efficient in filtering the particulate. The N95 masks are available with or without valve and with or without a metal nose piece. HOSPECO also carries nuisance masks for light duty and general applications.

**Disposable Apparel / Safety Apparel**

With disposable apparel, there are different levels of protection; Liquid Splash (Microporous), Particulate and Light Spray (SMS). Our line of hi-visibility safety apparel protects the worker when in situations where there are moving vehicles and his/her visibility needs to be enhanced for personal safety.

**First Aid / Eye Wash Stations**

OSHA guidelines for a safe and healthy workplace require all employers to provide first aid and some safety and emergency response training for their employees due to potential accidental or occupational exposures to bloodborne pathogens (21 CFR 1910.1030) and other toxic and hazardous materials. ProWorks® offers first aid kits, blood spill cleanup kits, and eye wash stations to support OSHA compliant programs. First aid kits are available in several sizes to match varying workplace head counts.
