## Important Information - New Glove Packaging

June 1, 2022

We are extremely excited to announce that months of effort have culminated in the realization of a new brand strategy – aligning all gloves, safety & PPE items from Safety Zone, Impact Products and MALT under a unified and cohesive Safety Zone brand. Supply Source is proud to introduce and launch this new branding and updated packaging in our single-use glove category!

While we are excited about this change, let's be very clear about what's NOT changing! The gloves inside the boxes remain the same! The same great quality that you would expect from Safety Zone! There are no changes to product specifications, item numbers or bar codes – just a fresh & unified new look to our packaging!

Some things that you will notice:

- A **refreshed Safety Zone logo**. We have maintained the diamond and colors from the original logo but have removed the “Gilbert” icon from the brand logo. But don't worry ... Gilbert is here to stay! You will see him in various other places on both inner box and outer case packaging.
- Our Safety Zone gloves are now **differentiated by their sub-brands**: Safety Zone ProGuard for general purpose industrial use gloves, Safety Zone DiversaMed for medical-grade exam gloves.
- A fresh new look at both the inner box and case level! **Common design elements** are incorporated in both ProGuard and DiversaMed series gloves, with the medical-grade exam gloves having a white facing, allowing for quick differentiation at the consuming customer level.
- **Color coding remains the same** at the inner box and case level as the current Safety Zone offering: Blue for Nitrile, Green for Vinyl, Yellow for Latex and Gray for Poly.
- All materials are now available in light-weight, mid-weight, heavy-weight, and extra heavy-weight, **so you will always be able to supply the perfect glove** for any application.

The transition to the new packaging will be a running change and take place over the next few months. You will begin to see updated packaging in nitrile gloves as early as mid-to-late June. Until current inventories are depleted you may receive either the old or the new packaging.

- To make it easy for receiving personnel, the part numbers and barcodes do not change and continue to be prominently displayed on master cases, with the glove-type color coding also remaining the same.
- Individual specification sheets are available for each product showing the old and new packaging. You may download them from our website at: [safety-zone.com](http://safety-zone.com)

We are proud to take this next step in bringing our brands together as we know that an increased bundle of products from a single source makes us a more valuable partner to your business.

Thank you for your continued business and support! If you have any questions regarding this transition, please reach out to your Avison manufacturer's rep, your Supply Source sales manager, or our customer service team.

## New Packaging

### General Purpose Nitrile

### General Purpose Vinyl

### General Purpose Latex

### Polyethylene

### Medical-Grade Exam Nitrile
