

## ALUMINUM / ROUNDS & LIDS

### PRODUCT FEATURES:

- > Aluminum containers are oven-safe and freezer-safe so that meals can be frozen and heated in the oven in the same container
- > Ideal for all food temperatures
- > The maximum strength of the full curl rim delivers safer handling
- > Pairing the container with its tight-fitting lid prevents spills, leaks, and contamination during transport and storage
- > Heat conductivity from the aluminum container helps cook food evenly and also helps maintain food hot during delivery
- > Stackable for space maximization
- > Clear lids make it easy to identify contents quickly
- > Do not place lids in the oven
- > Provides an impermeable metal barrier to oils and fats, water vapor, and microorganisms
- > Aluminum is Reusable and Recyclable. Recycled aluminum makes up 80% of U.S. aluminum production\*
