

March 10, 2025

To our trusted partners,

The administration announced an additional 10% [increase in tariffs](#) on all imports from China effective March 4th. In addition, the Department of Commerce announced Countervailing Duty (CVD) rates of 6-153% on Molded Fiber Products imported from China. Due to these announcements, World Centric will adjust pricing effective April 1, 2025. Pricing will increase up-to 15% on molded fiber and up-to 10% on other products imported from China. We consider these tariffs to be a Force Majeure event and will therefore be implemented as such.

New pricing will be effective for warehouse orders received on or after April 1, 2025. Price increases will be effective immediately for custom print and direct container orders. World Centric has some remaining molded fiber inventory with PFAS, we will not be increasing pricing on any of these items; if accepted in your state, we encourage you to take advantage of these lower rates. We reserve the right to restrict order size to not exceed 105% of the historical average until the price increase goes into effect. Your sales representative will provide you with new price sheets shortly and answer any questions you may have.

World Centric is committed to providing high-quality products, maintaining competitive pricing, and donating 25% of our net profits to social and environmental grassroots organizations. We appreciate your continued business and partnership.

Regards,

Deven Young
